BALANCE OF PAYMENTS¹

JANUARY – DECEMBER 2011

Current and Capital Account

In the period January – December 2011 the *Current and Capital account* was positive, amounting to EUR 1232.5 million (3.1% of GDP) against a deficit of EUR 184.9 million (0.5% of GDP) in the same period of 2010.

Current Account

The Current account in the period January – December 2011 was positive and amounted to EUR 743.7 million, increasing by EUR 1219.3 million against the same period of 2010 (a deficit of EUR 475.6 million). As a percentage of GDP² the *current account* amounted to 1.9% and its balance was higher by 3.2 p.p. compared to January – December 2010 (a deficit of 1.3% of GDP). The main factor for the *current account* balance increase was the lower *trade deficit* (by EUR 918.8 million).

The **Current account** for December 2011 was negative, amounting to EUR 256.2 million compared to a negative account of EUR 310.2 million for the same month in 2010. The main factors for its improvement were the lower *trade deficit* (by EUR 54 million) and the higher balances on *Services* (by EUR 68.9 million).

The **trade balance** for December 2011 was negative (EUR 319.8 million), improving by EUR 54 million against December 2010 (a deficit of EUR 373.8 million). Over the reporting period of 2011 the **trade balance** was negative, amounting to EUR 1844.9 million (4.7% of GDP), and the deficit improved by EUR 918.8 million compared to January – December 2010 (a deficit of EUR 2763.7 million, 7.7% of GDP).

- In January – December 2011 **exports (FOB)** amounted to EUR 20 097.1 million and increased by 29.1% (EUR 4535.9 million) compared to the same period of 2010 (EUR 15 561.2 million). The exports in January – December 2010 increased by 33% year-on-year. In December 2011 **exports (FOB)** amounted to EUR 1583.5 million against EUR 1395.3 million for the same month of 2010, increasing by EUR 188.3 million (13.5%).
- In January – December 2011 **imports (FOB)** amounted to EUR 21 942 million and increased by 19.7% (EUR 3617.1 million) compared to the same period in 2010 (EUR 18 324.8 million). The imports increased in January – December 2010 by 15.4% year-on-year. **Imports (FOB)** amounted to EUR 1903.3 million in December 2011 against EUR 1769.1 million for the same month of 2010, growing by EUR 134.2 million (7.6%).

¹ The analysis is prepared after the analytical table of the Balance of Payments. The 2010 and 2011 data are preliminary. In accordance with the BNB practice and with the ECB data revision requirements (included in the ECB Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB), the data for November 2011 are revised. With the January 2012 report revisions for January 2009 - December 2011 will be presented.

² GDP for 2011 - EUR 39,408 million (BNB estimate) and GDP for 2010 - EUR 36,033 million (NSI data as of 11.03.2011).

The balance on the **Services item** was positive and amounted to EUR 2400.4 million (6.1% of GDP) increasing by EUR 384.6 million against January – December 2010 (a positive balance of EUR 2015.9 million, 5.6% of GDP). In December 2011 the balance on the item was positive amounting to EUR 87.6 million compared to a positive balance of EUR 18.7 million for the same month in 2010.

- The **travel balance** was positive, amounting to EUR 1893.7 million (4.8% of GDP) against a positive balance of EUR 1815.9 million (5% of GDP) in January – December 2010.

The **Income balance** was negative amounting to EUR 1518.3 million (3.9% of GDP) against a negative item of EUR 1275.8 million (3.5% of GDP) in January – December 2010. In December 2011 the balance on the item was negative and amounted to EUR 136.2 million compared to a negative balance of EUR 118.9 million for the same month in 2010.

The **net current transfers** were positive amounting to EUR 1706.5 million (4.3% of GDP), against a positive balance of EUR 1548.1 million (4.3% of GDP) in January – December 2010, growing by EUR 158.4 million. The receipts from the European Union (EUR 702.1 million) decreased by EUR 15.7 million against January – December 2010 (EUR 717.7 million). The *current transfer* payments towards the EU amounted to EUR 424.6 million in the reporting period against EUR 417.3 million in the same period of 2010. In December 2011 the item *Current transfers, net* was positive amounting to EUR 112.2 million against a positive item of EUR 163.7 million for the same month in 2010.

Capital Account

The **Capital account balance**³ was positive and amounted to EUR 488.8 million (including EUR 457.4 million net capital transfers from the EU), against a positive balance of EUR 290.7 million (of which EUR 247 million net capital transfers from EU funds) for the period January – December 2010.

Financial Account

The **Financial account** balance was negative and amounted to EUR 1385.5 million against a negative balance of EUR 174.4 million for the same period in 2010. In December 2011 the *financial account* was negative amounting to EUR 46.9 million against a positive account of EUR 438 million for the same month of 2010.

According to preliminary data the **Foreign Direct Investment in Bulgaria** for the reporting period was EUR 1064.5 million (2.7% of GDP) against EUR 1778.5 million (4.9% of GDP) in January – December 2010. The *Equity Capital* amounted to EUR 1091.9 million against EUR 1608.1 million in the same period of 2010. The receipts from *real estate investment* of non-residents were higher by EUR 21 million (9.3%) compared to January – December 2010 and amounted to EUR 246.1 million against EUR 225.1 million in the same period of 2010. In January – December 2011 the *Other Capital, net* was negative and amounted to EUR 109.9 million, against a positive item of

³ The Capital Account comprises items *Capital Transfers* and *Acquisition or Disposal of Non-Produced Non-financial Assets*.

EUR 74.2 million in January – December 2010. In December 2011 the *foreign direct investment in the country* amounted to EUR 274.7 million against EUR 346.9 million in December 2010.

Portfolio investment – assets increased by EUR 12.7 million, compared to an increase of EUR 574.9 million for the same period in 2010. The banks decreased their *portfolio investment – assets* by EUR 216.6 million against an increase of EUR 159.4 million for the period January – December 2010. In December 2011 the *portfolio investment – assets* increased by EUR 44 million against an increase of EUR 202.1 million in December 2010.

Portfolio investment – liabilities decreased by EUR 300.7 million against a decrease of EUR 86.3 million for January – December 2010. In December 2011 *portfolio investment – liabilities* decreased by EUR 45.9 million against an increase of EUR 8.2 million in the same month of 2010.

Other investment – assets increased by EUR 646.1 million in January – December 2011, against an increase of EUR 47.3 million for the same period in 2010. The item *Currency and Deposits* of banks increased by EUR 674.8 million against a decrease of EUR 409.5 million in January – December 2010. In December 2011 *other investment – assets* increased by EUR 34.9 million, against an increase of EUR 108 million. The item *Currency and Deposits* of banks increased by EUR 3.2 million in December 2011 against a decrease of EUR 66.8 million in December 2010.

Other investment – liabilities decreased by EUR 1300.2 million against a decrease of EUR 1026.4 million for January – December 2010. The decrease for the reporting period in 2011 was due mainly to the decline in non-residents' deposits in local banks (by EUR 1117.9 million). The net loan liabilities to non-residents decreased by EUR 219.2 million, compared to a net decrease of EUR 416.7 million for the same period in 2010. In December 2011 *other investment – liabilities* decreased by EUR 198.3 million against an increase of EUR 405.7 million in the same month of 2010. In December 2011 non-residents' deposits in local banks decreased by EUR 80.2 million against a decrease of EUR 42.5 million in the same month of 2010. In December 2011 the net loan liabilities declined by EUR 117.1 million against an increase of EUR 407.8 million in the same month of 2010.

The item **Net errors and omissions** was positive, amounting to EUR 311.6 million against a negative item of EUR 24.6 million in January – December 2010.

The **Overall balance** was positive, amounting to EUR 158.7 million (0.4% of GDP) against a negative *overall balance* of EUR 383.9 million (1.1% of GDP) in January – December 2010.

In January – December 2011 the **BNB reserve assets**⁴ increased by EUR 158.7 million. In December 2011 the *BNB reserve assets* increased by EUR 214.8 million.

⁴ Excluding valuation changes due to exchange rate or price changes, changes associated with the creation of reserve assets (monetisation/demonetisation of gold and allocation or cancellation of SDRs), and reclassifications.

DIRECT INVESTMENT (January – December 2011)¹

According to preliminary data, the *Foreign direct investment in Bulgaria* for January – December 2011 increased by EUR 1064.5 million (2.7% of GDP), compared to an increase of EUR 1778.5 million (4.9% of GDP) for January – December 2010.

* For assets, a minus sign denotes an increase in holdings, and a positive figure represents a decrease.

The attracted *Equity Capital (acquisition/disposal of shares and equities in cash and contributions in kind by non-residents in/from the capital and reserves of Bulgarian enterprises and receipts/payments from/for real estate deals in the country)* for January – December 2011 amounted to EUR 1091.9 million. It decreased by EUR 516.2 million compared to that attracted in the same period of 2010 (EUR 1608.1 million). *The receipts from real estate investments of non-residents* amounted to EUR 246.1 million, compared to EUR 225.1 million attracted in January – December 2010.

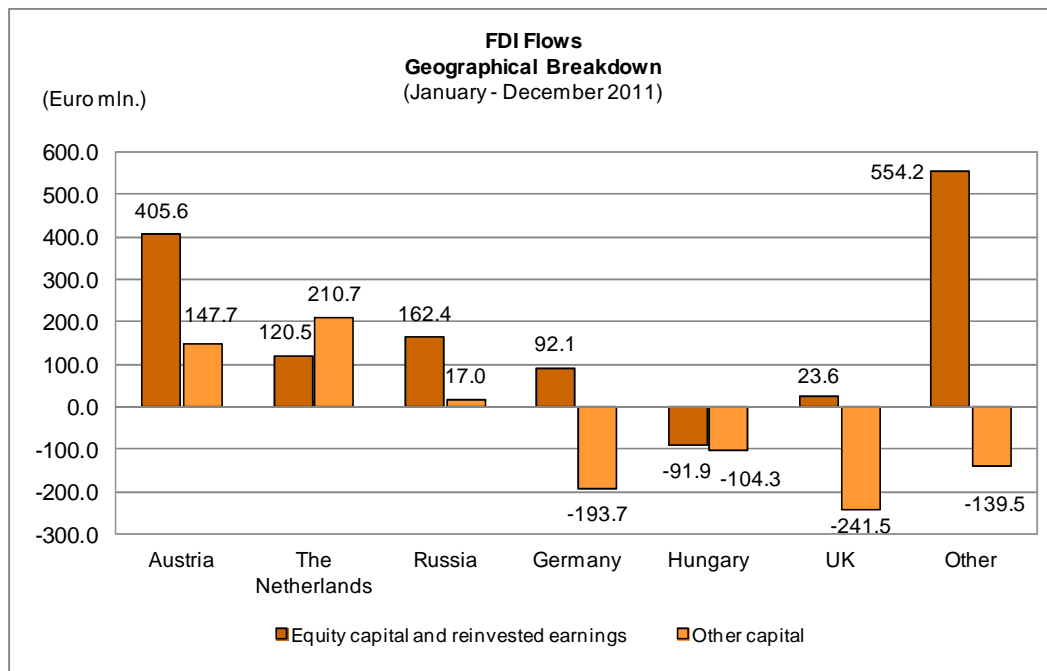

The *other capital, net (the change in the net liabilities of the direct investment enterprise to the direct investor on financial loans, suppliers' credits and debt securities)* was negative, amounting to EUR 109.9 million in January – December 2011, compared to a positive *other capital, net* of EUR 96.2 million in January – December 2010.

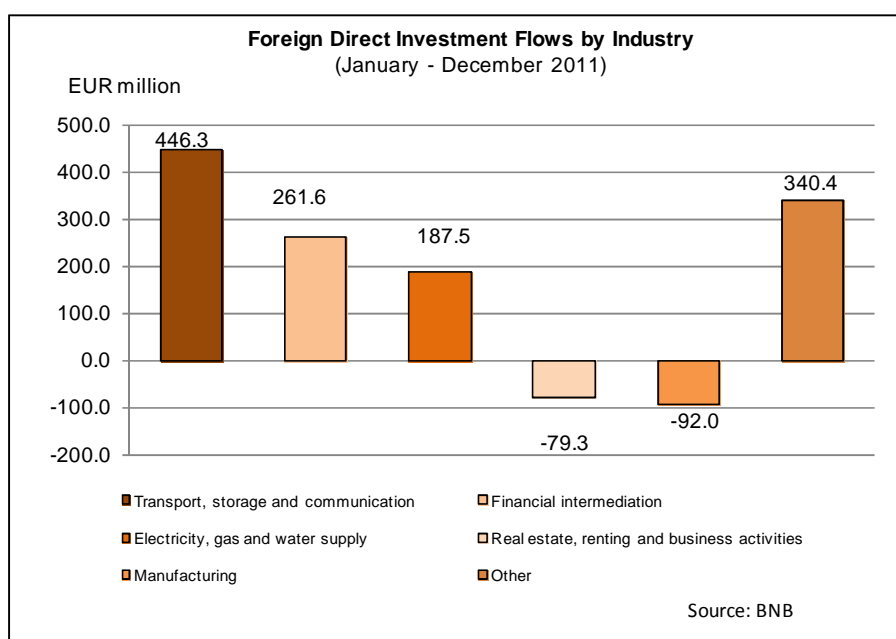

Based on preliminary data on profit/loss, the *Reinvested Earnings² (the share of non-residents in the undistributed earnings/ loss of the enterprise)* in January – December 2011 were estimated at EUR 82.5 million,

against EUR 96.2 million in the same period of 2010.

By country, the largest direct investments in Bulgaria for the period January – December 2011 were those of the Austria (EUR 553.3 million), the Netherlands (EUR 331.2 million) and Russia (EUR 179.4 million). The largest negative flows for the period were towards Germany (EUR -101.6 million), Hungary (EUR -196.2 million) and United Kingdom (EUR -217.9 million) mainly due to net payments on intercompany credits in accordance with the loan repayment schedules of enterprises.

By branch, the largest net inflows for January – December 2011 were in *Transport, storage and communication* (EUR 446.3 million) and *Financial intermediation* (EUR 261.6 million). The largest net payments in the reporting period were in *Manufacturing* (EUR 92 million).

According to preliminary data in January – December 2011 *Direct investment abroad* increased by EUR 125 million, compared to an increase of EUR 193.4 million in January – December 2010.

¹ Preliminary data for 2010 and 2011. The data for November 2011 are revised.

When comparing the data yoy it should be taken into account that the initial data on the January – December 2010 FDI, published in a BNB press release as of February 14, 2011 (www.bnb.bg, section Press Releases/Statistical Press Releases/Balance of Payments), was subsequently revised.

With the January 2012 report revisions of January 2009 - December 2011 data will be presented.

The 2010 and 2011 data are subject to revisions with the quarterly reports to the BNB from foreign direct investment enterprises and with the annual NSI data.

GDP for 2011 - EUR 39,408 million (BNB estimate) and GDP for 2010 -- NSI data (as of 11.03.2011) at EUR 36,032.9 million.

² The 2010 and 2011 data include only estimates of banks' data on reinvested earnings.

* Analytic presentation in accordance with IMF 5-th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for November 2011 are revised. With the January 2012 report, balance of payments data for the period January 2009 - December 2011 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.

For 2011 preliminary NSI data as of 3 February 2012 which include data from the system INTRASTAT for the EU member states and from customs declarations for non-EU countries.

The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

³ Estimates following a methodology of the BNB and the NSI.

⁴ Estimates following a methodology of the BNB. Data for 2007-2011 are based on preliminary NSI data on the numbers of foreign visitors and Bulgarians, who have travelled abroad.

⁵ Estimates following a methodology of the BNB.

⁶ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁷ The item includes *Capital transfers* and *Acquisition/Disposal of nonproduced nonfinancial assets*.

⁸ Preliminary data. Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

The 2010 and 2011 data include only banks' data on reinvested earnings.

⁹ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

Due to quarterly reporting data are subject to revisions.

¹⁰ Mergers and acquisitions are included in this item.

¹¹ Banks, other nonbank financial institutions, insurance companies and pension funds' data.

¹² Data on net change of trade credits-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹³ Bank for International Settlements (BIS) data. For Q4 2010 and 2011 - data are subject to revisions.

¹⁴ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹⁵ Excluding valuation changes due to the exchange rate or price changes, changes associated with the creation of reserve assets (monetization/demonetization of gold and the allocation or cancellation of SDRs) and reclassifications. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Analytic presentation in accordance with IMF 5-th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for November 2011 are revised. With the January 2012 report, balance of payments data for the period January 2009 - December 2011 are to be revised.
² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.
For 2011 preliminary NSI data as of 3 February 2012 which include data from the system INTRASTAT for the EU member states and from customs declarations for non-EU countries.

³ The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.
⁴ Estimates following a methodology of the BNB and the NSI.

⁵ Estimates following a methodology of the BNB. Data for 2007-2011 are based on preliminary NSI data on the numbers of foreign visitors and Bulgarians, who have travelled abroad.

⁶ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁷ The item includes *Capital transfers* and *Acquisition/Disposal of nonproduced nonfinancial assets*.
⁸ Preliminary data. Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

⁹ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.
Due to quarterly reporting data are subject to revisions.

¹⁰ Mergers and acquisitions are included in this item.
¹¹ Banks, other nonbank financial institutions, insurance companies and pension funds data.

¹² Data on net change of trade credits-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.
Due to quarterly reporting data are subject to revisions.

¹³ Bank for International Settlements (BIS) data. For Q4 2010 and 2011 - data are subject to revisions.
¹⁴ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

¹⁵ Excluding valuation changes due to the exchange rate or price changes, changes associated with the creation of reserve assets (monetization/demonetization of gold and the allocation or cancellation of SDRs) and reclassifications. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Analytic presentation in accordance with IMF 5th edition of the "Balance of Payments Manual".

¹⁾ Preliminary data. The data for November 2011 are revised. With the January 2012 report, balance of payments data for the period January 2009 - December 2011 are to be revised.

²⁾ Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.

For 2011, preliminary NSI data as of 3 February 2012, which include data from the system INTRASTAT for the EU member states and from customs declarations for non-EU countries.

³⁾ The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

⁴⁾ Estimates following a methodology of the BNB. Data for 2007-2011 are based on preliminary NSI data on the

numbers of foreign visitors and Bulgarians, who have travelled abroad.

⁵⁾ Estimates following a methodology of the BNB.

⁶⁾ The item includes Capital transfers and Acquisition/Disposal of nonproduced nonfinancial assets.

⁷⁾ Preliminary data. Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

⁸⁾ Data on net change of trade credits-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.

⁹⁾ Due to quarterly reporting data are subject to revisions.

¹⁰⁾ Mergers and acquisitions are included in this item.

¹¹⁾ Banks, other notbank financial institutions, insurance companies and pension funds' data.

¹²⁾ Data on net change of trade credits-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.

¹³⁾ Due to quarterly reporting data are subject to revisions.

¹⁴⁾ Bank for International Settlements (BIS) data. For Q4 2010 and 2011 - data are subject to revisions.

¹⁵⁾ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

¹⁶⁾ Due to quarterly reporting data are subject to revisions.

¹⁷⁾ Excluding valuation changes due to the exchange rate or price changes, changes associated with the creation of reserve assets (monetization/demonetization of gold and the allocation

or cancellation of SDRs) and reclassifications. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Analytic presentation in accordance with IMF 5th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for November 2011 are revised. With the January 2012 report, balance of payments data for the period January 2009 - December 2011 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.

For 2011 preliminary NSI data as of 3 February 2012 which include data from the system INTRASTAT for the EU member states and from customs declarations for non-EU countries.

The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

³ Estimates following a methodology of the BNB and the NSI.

⁴ Estimates following a methodology of the BNB. Data for 2007-2011 are based on preliminary NSI data on the

numbers of foreign visitors and Bulgarians, who have travelled abroad.

⁵ Estimates following a methodology of the BNB.

⁶ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁷ The item includes *Capital transfers* and *Acquisition/Disposal of nonproduced nonfinancial assets*.

⁸ Preliminary data. Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

⁹ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

¹⁰ Due to quarterly reporting data are subject to revisions.

¹¹ Mergers and acquisitions are included in this item.

¹² Banks, other nonbank financial institutions, insurance companies and pension funds' data.

¹³ Data on net change of trade credits-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹⁴ Bank for International Settlements (BIS) data. For Q4 2010 and 2011 - data are subject to revisions.

¹⁵ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹⁶ Excluding valuation changes due to the exchange rate or price changes, changes associated with the creation of reserve assets (monetization/demonetization) of gold and the allocation

or cancellation of SDRs) and reclassifications. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Standard presentation in accordance with IMF 5th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for November 2011 are revised. With the January 2012 report, balance of payments data for the period January 2009 - December 2011 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.

For 2011 preliminary NSI data as of 3 February 2012 which include data from the system INTRASTAT for the EU member states and from customs declarations for non-EU countries.

The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

³ Estimates following a methodology of the BNB and the NSI.

⁴ Estimates following a methodology of the BNB. Data for 2007-2011 are based on preliminary NSI data on the

numbers of foreign visitors and Bulgarians, who have travelled abroad.

⁵ Estimates following a methodology of the BNB.

⁶ The item includes *Capital transfers and Acquisition/Disposal of nonproduced nonfinancial assets*.

⁷ Preliminary data. Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

⁸ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

⁹ Due to quarterly reporting data are subject to revisions.

¹⁰ Mergers and acquisitions are included in this item.

¹¹ Banks, other nonbank financial institutions, insurance companies and pension funds data.

¹² Data on net change of trade credits-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.

¹³ Due to quarterly reporting data are subject to revisions.

¹⁴ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Excluding valuation changes due to the exchange rate or price changes, changes associated with the creation of reserve assets (monetization/demonetization of gold and the allocation or cancellation of SDRs) and reclassifications. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Standard presentation in accordance with IMF 5th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for November 2011 are revised. With the January 2012 report, balance of payments data for the period January 2009 - December 2011 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.

³ For 2011 preliminary NSI data as of 3 February 2012 which include data from the system INTRASTAT for the EU member states and from customs declarations for non-EU countries.

⁴ The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

⁵ Estimates following a methodology of the BNB and the NSI.

⁶ Estimates following a methodology of the BNB. Data for 2007-2011 are based on preliminary NSI data on the numbers of foreign visitors and Bulgarians, who have travelled abroad.

⁷ Estimates following a methodology of the BNB.

⁸ The item includes *Capital transfers* and *Acquisition/Disposal of nonproduced nonfinancial assets*.

⁹ Preliminary data. Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

¹⁰ The 2010 and 2011 data include only banks' data on reinvested earnings.

¹¹ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

¹² Due to quarterly reporting data are subject to revisions.

¹³ Mergers and acquisitions are included in this item.

¹⁴ Banks, other nonbank financial institutions, insurance companies and pension funds data.

¹⁵ Data on net change of trade credits-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.

¹⁶ Due to quarterly reporting data are subject to revisions.

¹⁷ Data for International Settlements (BIS) data. For Q4 2010 and 2011 - data are subject to revisions.

¹⁸ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

¹⁹ Due to quarterly reporting data are subject to revisions.

²⁰ Excluding valuation changes due to the exchange rate or price changes, changes associated with the creation of reserve assets (monetization/demonetization of gold and the allocation or cancellation of SDRs) and reclassifications. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Preliminary data. The data for November 2011 are revised. With the January 2012 report, balance of payments data for the period January 2009 - December 2011 are to be revised.

¹ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

² On the basis of monthly banks¹, insurance companies and pension funds and other non-bank financial institutions reports and the quarterly reports of other investment intermediaries.

Due to the quarterly reporting of the non-bank investment intermediaries the data are subject to revisions.

³ Data from the monthly reports of the Central Depository.

⁴ The data on government debt securities, issued on the internal market, are based on quarterly reports of the primary dealers.

⁵ Due to quarterly reports of the primary dealers of government debt securities, data are subject to revisions.

⁶ For issues of government debt securities on external markets the data are from the monthly banks' reports and the Ministry of Finance.

* Standard presentation in accordance with IMF 5-th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for November 2011 are revised. With the January 2012 report, balance of payments data for the period January 2009 - December 2011 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.

For 2011 preliminary NSI data as of 3 February 2012 which include data from the system INTRASTAT for the EU member states and from customs declarations for non-EU countries.

The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

³ Estimates following a methodology of the BNB and the NSI.

⁴ Estimates following a methodology of the BNB. Data for 2007-2011 are based on preliminary NSI data on the numbers of foreign visitors and Bulgarians, who have travelled abroad.

⁵ Estimates following a methodology of the BNB.

⁶ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁷ The item includes *Capital transfers* and *Acquisition/Disposal of nonproduced nonfinancial assets*.

⁸ Preliminary data. Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

The 2010 and 2011 data include only banks' data on reinvested earnings.

⁹ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

Due to quarterly reporting data are subject to revisions.

¹⁰ Mergers and acquisitions are included in this item.

¹¹ Banks, other nonbank financial institutions, insurance companies and pension funds' data.

¹² Data on net change of trade credits-assets (paid advances and receivables from suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹³ Bank for International Settlements (BIS) data. For Q4 2010 and 2011 - data are subject to revisions.

¹⁴ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹⁵ Excluding valuation changes due to the exchange rate or price changes, changes associated with the creation of reserve assets (monetization/demonetization of gold and the allocation or cancellation of SDRs) and reclassifications. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* The indicators, for the calculation of which external debt data are used, are published with the external debt data for the reporting period.

¹¹ Data for 2010 and 2011 are preliminary. In accordance with the BNB practice and with the ECB data revision requirements (included in the ECB Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB), the data for November 2011 are revised.

Flow data include the period from the beginning of the year to the reporting month, stock data are as of the end of the reporting month.

¹² The Euro equivalent is calculated using the e.o.p. exchange rates of the respective foreign currencies.

Data on external liabilities on trade credits are included in the debt stock.

¹³ Includes General Government's external debt, the external debt of banks from the public sector and of non-financial enterprises from the public sector, as well as the publicly guaranteed external debt of the private sector (in accordance with para 5.5-5.6 of External Debt Statistics: Guide for Compilers and Users, 2003). Sources: Ministry of Finance, Bulgarian National Bank, banks, local companies.

¹⁴ Sources: banks, local companies.

¹⁵ In the calculation of the indicators in which gross domestic product (GDP) is included the following data are used:

GDP for 2011 at Euro 39 408 million (BNB estimate) and GDP for 2010 – EUR 36 032.9 (NSI data as of 11.03.2011).

¹⁶ Goods and non-factor services. The indicator is calculated on an annual basis.

¹⁷ Actual payments. The Euro equivalent is calculated using the monthly average exchange rates of the respective foreign currencies. Payments on revolving credits are not included.

¹⁸ Preliminary data for 2010. For 2011 preliminary NSI data as of 3 February 2012, which include data from the system INTRASTAT

for the EU member states and from customs declarations for non-EU countries.

¹⁹ Data are provided by direct investment companies reporting to the BNB, by the Agency for Privatization, the NSI, the Central Depository and the banks.

²⁰ A negative sign (-) denotes an increase in assets and a decrease in liabilities and a positive sign (+) denotes a decrease in assets and an increase in liabilities. Including Financial Derivatives.

¹¹ Data source for the monetary aggregates, banks' assets abroad and the forex deposits: Monetary Survey December 2011.

¹² Including BNB reserve assets, banks' assets abroad and nonfinancial sector deposits abroad.

¹³ Including monetary and non-monetary gold. Source: Issue Department, BNB.

¹⁴ Source: BIS International Banking Statistics. For the period October - December 2011 the data for September 2011 are used.

¹⁵ Difference between the amount of the Gross external debt and the amount of the Gross external assets.

¹⁶ The International Investment Position data are published quarterly within 3 months after the close of the reporting period.

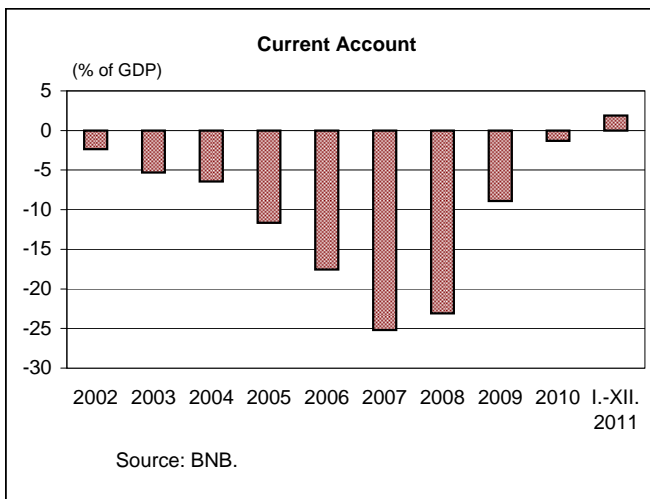

¹⁷ The proportion (in months) of BNB Reserve Assets as of end of reporting month to average Imports of Goods and Non-Factor Services for the last 12 months.

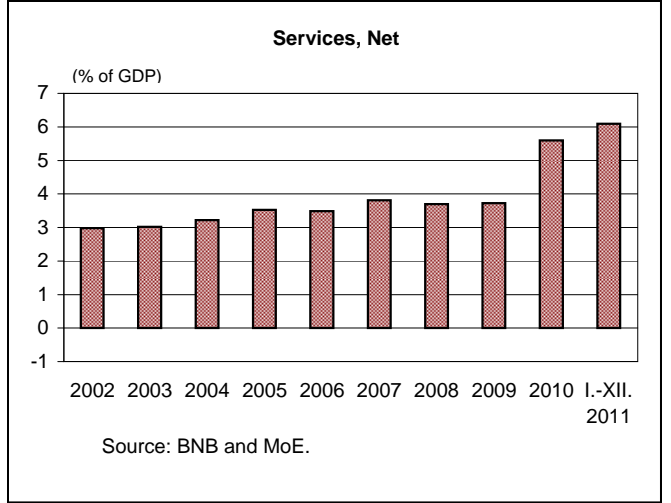

¹⁸ Forex deposits of population and non-financial sector.

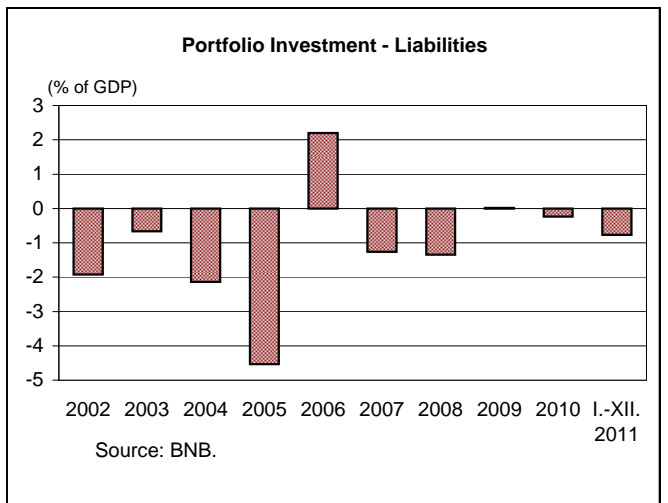

¹⁹ The index is for the reporting month.

²⁰ CPI based index calculated for the reporting month.

External Sector Indicators

EXTERNAL TRADE

EXTERNAL TRADE OF BULGARIA¹

January – November 2011

Exports

In January – November 2011 the exports (FOB) amounted to EUR 18,513.5 million compared to EUR 14,165.9 million for the same period in 2010, which is an increase of EUR 4,347.6 million (30.7%).

End Use

- The main contribution to the exports increase in January – November 2011 yoy was due to groups *Non-Ferrous Metals* (an increase of EUR 629.6 million, 38.6%), *Raw Materials – Others* (an increase of EUR 621.3 million, 45%) and *Raw Materials for the Food Industry* (an increase of EUR 485.4 million, 40.2%). Exports of *Petroleum Products* increased yoy by EUR 507.8 million (34%).

Main Trade Partners and Regions

▪ European Union

- Exports to the European Union increased yoy by EUR 2,889.7 million (33.3%), and their share in the total exports increased from 61.2% in January – November 2010 to 62.5% for the same period in 2011.

- The relative share of exports to the EU-15² member countries amounted to 47% in January – November 2011 compared to 46% for the same period in 2010.

- The highest increase of exports yoy was that to Germany – an increase of EUR 743.7 million (49.2%). Exports to Belgium increased by 73.9% (EUR 397.5 million) and to Romania - by 35.5% (EUR 459 million).

▪ Non-European Union Countries

- Exports to non-EU countries increased yoy by EUR 1,457.9 million (26.6%), and their share in the total exports decreased from 38.8% in January – November 2010 to 37.5% for the same period in 2011.

- The main contribution to the exports increase was due to exports to Turkey (an increase of EUR 411.3 million, 34.8%). The exports to Gibraltar increased by EUR 287.5 million (100.4%).

¹ The part *External Trade of Bulgaria* of the issue *Balance of Payments of Bulgaria* covers a reporting period shorter by one month than that of the balance of payments. According to Regulation (EC) No 638/2004 of the European Parliament and the Council NSI provides the EUROSTAT with detailed data on dispatches and arrivals of goods within the EU (INTRASTAT) within 70 days after the close of the reporting month (see methodological notes).

² Includes the EU member countries prior to May 1, 2004.

- Countries with Highest Shares in Total Exports

- The highest share in total exports was held by the exports to Germany (12.2% of total exports, EUR 2,255.8 million), to Romania (9.5%, EUR 1,751.1 million), to Turkey (8.6% of total exports, EUR 1,592.1 million) and Italy (8.3% of total exports, EUR 1,540.8 million).

**Impact of Physical Volumes and Prices on Exports and Imports
of Selected Groups of Goods¹**

(EUR million)

	Change against January - November 2010		
	Total	due to the factor:	
		quantity	price
Exports			
<i>Petroleum Products</i>	507.8	72.6	435.2
<i>Non-Ferrous metals</i>	629.6	129.0	500.6
Imports			
<i>Crude Oil and Natural gas</i>	665.4	-159.2	824.6
<i>Non-Ferrous Ores</i>	259.9	2.9	257.0

¹ By End-Use.

A minus sign denotes a decrease in imports payments.

Imports (CIF)

The imports (CIF) in January – November 2011 amounted to EUR 21,067.1 million compared to EUR 17,387.2 million for the same period in 2010, which is an increase of EUR 3,679.9 million (21.2%).

End Use

- The main contribution to the imports (CIF) increase in the period January – November 2011 yoy was due to the groups *Crude Oil and Natural Gas* (an increase of EUR 665.4 million, 23.6%), *Raw Materials – Others* (an increase of EUR 365.9 million, 29.1%), *Oils* (an increase of EUR 333.2 million, 44.4%) and *Iron and Steel* (an increase of EUR 309.7 million, 52.8%).

Main Trade Partners and Regions³

- European Union

- The imports from the EU increased yoy by EUR 1,365.2 million (15.3%), and their share in total imports decreased from 51.3% in January – November 2010 to 48.8% for the same period in 2011.

³ By country of origin.

- The share of imports from the EU-15⁴ decreased from 37.7% in January – November 2010 to 35.8% for the same period in 2011.

- The imports from Germany increased by EUR 246.2 million, 13.5% and from Italy - by EUR 225.9 million, 17.3%. Imports from Greece increased by EUR 141.7 million (15.3%) and from Romania – by EUR 192.4 million (18.7%).

- Non-European Union Countries

- Imports from the non-EU countries increased yoy by EUR 2,314.7 million (27.3%), and their share in total imports increased from 48.7% in January – November 2010 to 51.2% for the same period in 2011.

- The highest imports increase yoy was that from Russia (an increase of EUR 516.5 million, 17.4%). Imports from Ukraine increased by EUR 237.2 million (57.2%), from China – by EUR 305.8 million (32.6%), and from Kazakhstan - by EUR 417.4 million (159.5%).

- Countries with Highest Shares in Total Imports (CIF)

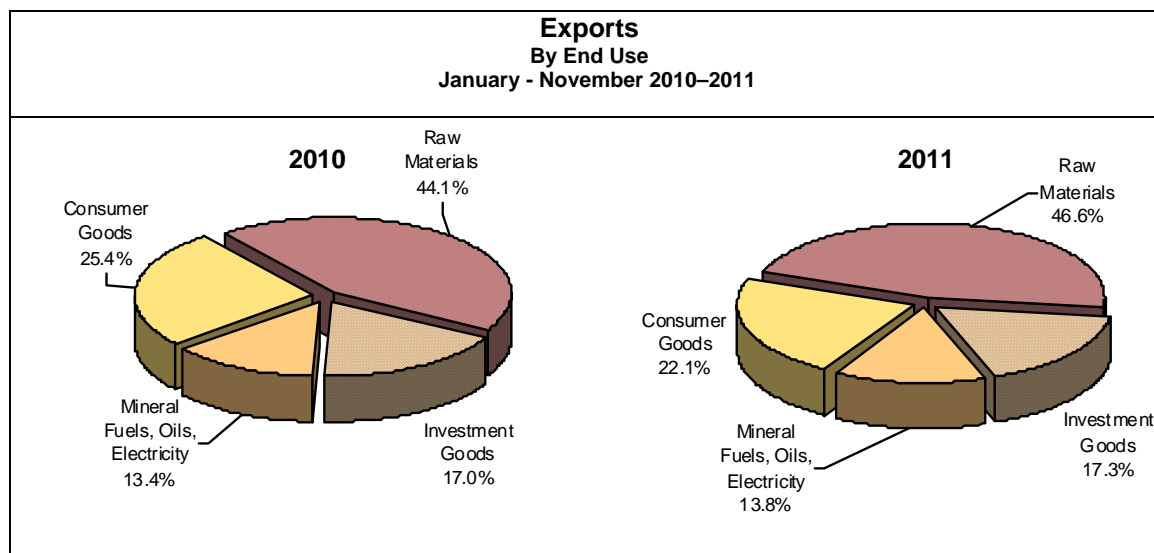

- The highest share in total imports (CIF) was that of the imports from Russia (16.5% of total imports, EUR 3,479.6 million), from Germany (9.8% of total imports, EUR 2,066 million), from Italy (7.3%, EUR 1,533.6 million) and from Romania (5.8% of total imports, EUR 1,220.2 million).

⁴ Includes the EU member countries prior to May 1, 2004.

For 2010 final data, provided by the NSI.

For 2011 preliminary data, provided by the NSI, including Intra-stat system data as of 03-February-12, and customs declarations data as of 03-January-12.

METHODOLOGICAL NOTES ON THE COMPILATION OF THE BALANCE OF PAYMENTS OF BULGARIA

The Bulgarian National Bank is in charge of the compilation of the balance of payments of the country. The legal basis for the balance of payments compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank. Data for the purposes of the BOP compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as on the basis of the Foreign Exchange Law. These data are processed by the “Balance of Payments and External Debt” Division within the Statistics Directorate of the BNB. At present, the Bulgarian National Bank compiles and publishes analytic presentation as well as standard presentation of the balance of payments in accordance with the *Fifth Edition* of the “**Balance of Payments Manual**” (IMF, 1993), the “**Balance of Payments Textbook**” (IMF, 1996), and the “**Guideline of The European Central Bank**” (ECB/2004/15)¹.

The balance of payments’ methodology is conceptually related to that of the *System of National Accounts (SNA)*. The items of the balance of payments correspond closely to the relevant categories of the rest of the world account in the SNA.

There is a close relationship between the *International Investment Position* and the balance of payments as well. The BOP financial account measures an economy's transactions in external financial assets and liabilities, which affect the stock of external financial assets and liabilities measured in the international investment position.

I. ACCOUNTING PRINCIPLES AND CONVENTIONS

The basic convention applied in the construction of Bulgaria's balance of payments is the implementation of the double entry system. Under credit, with a positive sign, are recorded: exports of goods and services, income receivable, offsets to non-refundable real and financial resources received (transfers), increases in financial liabilities, decreases in financial assets. Under debit, with a negative sign, are recorded: imports of goods and services, income payable, offsets to non-refundable real and financial resources provided, increases in financial assets, decreases in financial liabilities.

The time of recording of the balance of payments transactions is the time of change of ownership.

Transaction valuations are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

Valuation changes of the country’s external assets and liabilities are not included in the balance of payments.

The units of account for the balance of payments of Bulgaria are the EUR and the BG lev. The conversion into the unit of account is made using the exchange rate at the time of transaction. If not available, or inapplicable for other practical reasons, the average exchange rate for the reporting period is used.

¹ Guideline of The European Central Bank on the Statistical Reporting Requirements of The European Central Bank in the Field of Balance of Payments Statistics, The International Reserves Template and International Investment Position Statistics (ECB/2004/15)

II. BALANCE OF PAYMENTS COMPONENTS

The balance of payments components are compiled using the *International Transactions Reporting System* (ITRS), which includes (i) banks' reports, and (ii) reports by enterprises which have bank accounts abroad, pertaining to the residents' international transactions. These reports cover all components of the balance of payments table. As of January 1, 2010 the threshold under which transactions, reported by payment service providers are exempted from balance of payments reporting has risen from 25 000 BGN to 100 000 BGN. In addition, the data on certain BOP components collected by the ITRS is substituted for data from other sources: (i) monthly exports and imports of goods, provided by the NSI (ii) BNB estimations for the items Travel, Transportation, Compensation of employees, credit and Workers remittances, credit (iii) direct investment enterprise survey and quarterly reports of Bulgarian FDI abroad (iv) monthly reports by banks, other non-bank financial institutions, insurance companies and pension funds on their Portfolio investments, assets (v) data from the Central Depository on the Portfolio investments, liabilities (vi) administrative records, (vii) reports by enterprises having financial loans borrowed from and lent to non-residents and (viii) enterprise reports regarding their assets and liabilities (different from financial loans) with non-residents.

In the analytic presentation the balance of payments components are classified in the following main categories:

A. Current Account

The Current Account comprises the acquisition and provision of **goods and services, income**, and **current transfers** between the country and the rest of the world. The flows recorded on the credit side represent that part of the gross domestic product, which is provided to the rest of the world (exports of goods and services), as well as the provision of factors of production expressed by income receivable – compensation of employees and investment income (interest, dividends, etc.). Recorded are also offsets for non-refundable real and financial resources received (transfers).

The flows on the debit side represent the gross product created in the rest of the world and acquired by the domestic economy (imports of goods and services), as well as the acquisition of factors of production expressed by income payable. Recorded are also offsets to non-refundable real and financial resources provided.

- The Goods component of the BOP Current Account covers movable goods for which changes of ownership between residents and non-residents occur. The data on imports and exports FOB (Free on board) is based on customs declarations, as the codes used in them are after the Harmonised System for Description and Coding of Commodities of the World Customs Organisation, introduced in 1988 and supplemented in 1992. With the January 2006 data the Bulgarian National Bank and the National Statistics Institute jointly apply developed by them methodology for compilation of imports at FOB prices and receipts and payments regarding the freight transportation.² The methodology is based on the analysis of the CIF-FOB correlations for the imports of goods depending

²The 2002 – 2005 data are based on this methodology for compilation of imports at FOB prices and receipts and payments regarding the freight transportation.

on the different imports delivery categories, as well as on the different mode of transportation and nationality of the carrier.

The geographical breakdown of the Goods item of the BOP is based on the following principles:

For the intra EU trade in goods:

- In case of exports (or dispatches) is the country (or Member State) of final destination of the goods
- In case of imports (or arrivals) is the country (or Member State) of consignment of the goods.

For the trade with third countries (outside EU)

- In case of exports – partner country is the country of final destination of the goods
- In case of imports - partner country is the country of origin of the goods.

Sources: The source of data as from the beginning of 2003 until the end of 2006 was the Customs Agency and for preceding years - the Information services (at the Informational Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute received the exports and imports data, supplemented it with other information and processed it further. With the introduction of the system INTRASTAT (introduced with the Law on Statistics of Intercommunity Merchandise Trade, GG. N51 of 2006) with the January 2007 data changes in the way of reporting of the external trade of Bulgaria with the rest of the EU member states took place.

The introduction of the system INTRASTAT led to changes in the deadlines for receiving and processing of the data. The information on exports (dispatches) and imports (arrivals) of goods are reported by the INTRASTAT operators (the firms obliged to report) to the National Revenue Agency within 10 days after the close of the reporting month. These data are sent to the National Statistical Institute for further processing. The NSI reports to EUROSTAT aggregated monthly data (without breakdowns by trade partners and by type of goods) within 42 days after the close of the reporting month. The detailed intra trade data on dispatches and arrivals of goods are reported to EUROSTAT within 70 days after the close of the reporting month.

The BNB receives aggregated data from the NSI (without breakdowns by trade partners and by type of goods) on the country trade with the other EU member states within 35 days after the close of the reporting month, and these data are supplemented by the data of the Customs Agency on trade with third countries. Before that with the publication of the report on the balance of payments for the reporting month only aggregated data on exports and imports are published. The BNB receives from the NSI within 60 days after the close of the reporting month detailed data on dispatches and arrivals of goods.

As a result of these changes the schedule for external trade data reporting by the BNB is the following:

- Preliminary aggregated data (without breakdowns by trade partners and by type of goods) for the reporting month are published within 42 days after the close of the reporting month in the balance of payments table.
- Preliminary detailed data (with breakdowns by trade partners and by type of goods) for the reporting month are distributed to users not earlier than 73 days after the close of the reporting month.

The published series of data on exports and imports of the country on the web site of the BNB are updated not earlier than 73 days after the close of the reporting month.

In accordance with the common methodology, before publishing the data, the BNB and the NSI have to agree upon the data.

- The *Services* component comprises *transportation, travel, and other services*.

The Bulgarian National Bank derives the data on *freight transportation* from foreign trade data and the data on *passenger transportation* from travel data on the basis of estimates.

With the January 2006 data the BNB introduced a new methodology for compilation of receipts and payments regarding the freight transportation. The freight transportation receipts are set up on the basis of estimated receipts of resident carriers related to the country exports of goods. The payments are calculated as an estimation of the payments made by residents on behalf of non-resident carriers related to the country imports of goods. The receipts and payments are estimated according to mode of transportation and nationality of the carrier. With the introduction of the system INTRASTAT with the January 2007 data changes in the way of compilation of receipts and payments regarding the freight transportation of Bulgaria with the rest of the EU member states took place. Due to the delay in receiving the detailed data on trade of Bulgaria with the rest of the EU member states from the NSI, as of the date of publication of the preliminary balance of payments report for the corresponding month (42 days after the close of the reporting period) the preliminary compilation of receipts and payments of freight transportation is based on data for preceding years. These estimates are subject to revisions after receiving the preliminary detailed data (with breakdown by trade partners and by type of goods) on trade with the rest of the EU member states for the reporting month.

Travel covers goods and services, including those related to health and education, acquired by travellers for business and personal purposes. By the end of 2006 the data on travel is based on data from the Ministry of Internal Affairs on the number of travellers crossing the borders and on estimates of *per capita* expenditures, the latter based on the methodology for estimation of the receipts and expenditures from travel services – “*Methodology For Estimation of the Receipts and Expenditures from Travel in the Bulgarian Balance of Payments*” (Bulgarian National Bank, Ministry of Trade and Tourism, 18 November 1999).

As of the beginning of 2007 data for the number and the structure of foreigners who visited the country are based on information from the border police and NSI estimates. With the January 2010 data the BNB applies new methodology for estimation of the receipts and expenditures for travel and passenger transportation. The estimation model for the *Travel* item is based on the product of the number of travelers and the expenditure respective for a certain type of purpose of the travel (for more detailed information and questions, related to the methodologies applied, please contact us through the following e-mail: press_office@bnbank.org). The estimates of the expenditures (receipts) by purpose of the travel are based on the data collected during the *Border Survey among Traveling Bulgarians and Foreigners* conducted by the BNB during the period July 1997 – August 2008. The new methodology was applied for the first time with the data for January 2010, with back data revisions for the months of 2007, 2008 and 2009.

Other services item covers receipts and payments related to services other than transportation and travel (communication, construction, financial, leasing, insurance, cultural, sport and recreational services, etc.).

By end 2009 the *main sources* of information on this item were the banks' reports and the reports of enterprises having accounts abroad, as well as BNB estimates for the transactions below the threshold of 100 000 BGN. In accordance with Regulation (EC) No 924/2009 of the European Parliament and of the Council of 16 September 2009 on cross-border payments in the Community and repealing Regulation (EC) No 2560/2001 with effect from January 2010, the settlement-based national reporting obligations on payment service providers for balance of payments statistics related to payment transactions of their customers up to EUR 50 000 were removed. The quality and the scope of the data collected by the banks depend to a great extent on the threshold above which they report the transactions between residents and non-residents to the BNB. Raising the threshold without alternative source for these data would have considerably deteriorated the quality of the balance of payments data and particularly of the current account. The analysis showed that the loss of information for some services items could reach up to 90%. For that reason the BNB has changed the methodology for collection and compilation of data on other services and other items in the current account that still relied on the settlement data. As of the beginning of 2010 the BNB started conducting regular quarterly survey among enterprises trading internationally in services. Based on the results of the survey, with the publication of January 2011 balance of payments figures, data on other services for 2010 are revised. For the purpose of the monthly publications data on other services item is based on the settlement data from banks for the transactions above the threshold of BGN 100 000 and BNB estimations for transactions below the threshold. After the quarterly reports by enterprises are processed data is to be revised.

Income consists of two categories: (i) compensation of employees, and (ii) investment income. Compensation of employees covers wages, salaries and other benefits paid to non-resident workers in the country or received by resident workers abroad. The compensation of employees comprises also income due to illegal employment. By the end of 2006 the BNB estimates this flow in accordance with the *Methodology for Estimation of Flows due to Illegal Employment (14 March 2006)*.³ With the January 2010 data the BNB applies new methodology for estimation of the Compensation of employees, credit. The new methodology was applied for the first time with the data for January 2010, with back data revisions for the months of 2007, 2008 and 2009.

Investment income covers receipts and payments of income associated with external financial assets and liabilities. Included are receipts and payments on direct investment, portfolio investment, other investment, and receipts on reserve assets.

The *main sources* of information on the *Income* component are the banks' reports and the reports of non-bank financial institutions, insurance companies, pension funds, enterprises, the Ministry of Finance, and the Bulgarian National Bank.

³ The data as from April 2001 are based on this methodology.

Transfers are all real resources and financial items provided without a quid-pro-quo from one economy to another. *Current transfers* directly affect the level of disposable income of the economy, and the consumption of goods and services. That is, current transfers reduce the income and consumption potential of the donor and increase the income and consumption potential of the recipient. Included in the *Current transfers* are the EU pre-acquisition grants, other grants, gifts, inheritances, prizes won from lotteries, pensions, current taxes, social security contributions, etc. *Sources:* The Bulgarian National Bank receives information on current transfers from the Ministry of Finance, the Bulgarian Red Cross, the Agency for Foreign Aid, and from the reporting system of banks on transactions between residents and non-residents .

The item *Workers remittances, credit* is a sub-item of the *Current transfers, credit* in the Current account of the balance of payments and is a balancing item for transfers without a quid-pro-quo in cash or in kind.

Applying of a new methodology for estimation of these flows became necessary not only because the above described circumstances demanded it but because of the necessity to capture inflows transferred through both official and unofficial channels.

The estimates of the workers' remittances are based on the product of the number of Bulgarian emigrants, transferring money to their relatives and the amount of the average transfer⁴. Such calculations are made separately for the official and the unofficial transfer channels. The sum of the money transferred via those two channels is recorded as the amount of Workers' remittances to Bulgaria.

The data on the number of the Bulgarian emigrants are based on information from the *State Agency for Bulgarians abroad*, from the Bulgarian embassies and from Eurostat. The data on the percentage of the Bulgarian emigrants, transferring money; the shares of the official and unofficial channels and the average transfer for each of the channels used are based on the data collected via the Border survey.

The new methodology was applied for the first time with the data for January 2010, with backdata revisions for the months of 2007, 2008 and 2009.

B. Capital Account

The *Capital Account* consists of two categories: (i) *capital transfers* and (ii) *acquisition or disposal of non-produced, non-financial assets*. If in kind, a capital transfer consists of (i) a transfer of ownership of fixed assets, or (ii) forgiveness of a liability by a creditor when no counterpart is received in return. If in cash, a transfer is a *capital transfer* when it is linked to, or conditional on, the acquisition or disposal of fixed assets (for example, an investment grant).

Sources: The Bulgarian National Bank receives information on the capital account from the Ministry of Finance (for capital transfers from the EU funds), from the quarterly reports of the enterprises in the non-financial sector, the monthly reports of the notaries and others.

⁴ For more detailed information, please see "Methodology for estimation of the item Workers' Remittances (Bulgarian National Bank, March 2010). In case of further questions, related to the methodologies applied, please contact us through the following e-mail press_office@bnbank.org

C. Financial Account

The *Financial Account* comprises all transactions (actual and imputed) in the external financial assets and liabilities of an economy. The external assets and liabilities are primarily classified according to type of investment. Included in *Financial Account* are (i) *direct investment*, (ii) *portfolio investment* and (iii) *other investment*.

- *Direct investment* covers direct investment abroad, direct investment in reporting economy and mergers and acquisitions. *Direct investment* is a category of international investment in which a resident of one economy – a direct investor – acquires a lasting interest (at least 10% of the ordinary shares or the voting power) in an enterprise resident in another economy – a direct investment enterprise. The direct investment includes both the initial transaction, through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. The direct investment covers transactions relating to changes in the direct investor's share in the equity capital of the direct investment enterprise, inter-company debt transactions as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise. Direct investment is reported on a directional basis: direct investment abroad – as an asset, and direct investment in the reporting country – as a liability.

- The subitem *Mergers and Acquisitions* shows the transactions related to mergers and acquisitions. The purpose of its inclusion was to eliminate the influence of such deals over the reported foreign direct investment data. The international practice shows that these transactions have hardly any real impact on the production capacities and employment and the conclusions drawn from the interpretation of foreign direct investment data in which data on mergers and acquisitions are included might be misleading about investment flows, developments, branch and geographical structure. (*“European Central Bank, Eurostat, Foreign Direct Investment Task Force Report”, March 2004, para.332*)

Sources: The Bulgarian National Bank receives monthly data on direct investments in the country from the Privatisation Agency, from the Central Depository, from the reporting system of banks on transactions between residents and non-residents, from notaries and registry offices; quarterly data from the Financial Supervision Commission, from the direct investment enterprises, from the National Statistical Institute, from the Banking Supervision Department of the BNB, from the insurance companies and pension insurance companies; annual data from the NSI on foreign direct investment stock in enterprises from the non-financial sector..

For data on direct investments abroad the Bulgarian National Bank uses the information from FDI declaration forms, from quarterly reports of non-financial sector enterprises and from the reporting system of banks on transactions between residents and non-residents ..

- *Portfolio investment* includes *portfolio investment, assets and portfolio investment, liabilities*.

Portfolio investment covers transactions in shares and equity if the investor's share in the capital is less than 10%, transactions in bonds, notes, money market and other tradable securities.

The *main source* of information on the liabilities side of the *Portfolio investment* is the data provided by the Ministry of Finance, the Bulgarian National Bank, banks, enterprises holding bank accounts abroad, and the Central Depository. Data on the assets side of the *Portfolio investment* is provided by banks (which give information about their and their clients' portfolio investments), non-bank financial institutions, insurance companies and pension funds, the Bulgarian National Bank and the Ministry of Finance.

- *Other investment* covers trade credits, loans, currency deposits, and other assets and liabilities.

According to the balance of payments conventions trade credit arise from the direct extension of credit from a supplier to a buyer, i.e this is a credit extended by a trade partner without issue of a tradable security.

The main source of information on trade credits-assets and liabilities are the quarterly reports of enterprises on their assets/liabilities to non-residents.

Loans item includes received and paid principals on short- and long-term loans between residents and non-residents if no issue of a tradable security is involved with these loans.

Transactions concerning disbursements and repayments of principals on IMF loans and disbursements on loans on BOP support are not included in the item *Loans*. They are recorded in the relative items of *group E. Reserves and Related Items*.

Data on the item *Loans* is received by the Ministry of Finance, the Bulgarian National Bank, the banks and directly by the enterprises that have lent to or borrowed from abroad. The latter report quarterly data to the BNB because of which the monthly data on *Loans, Other sectors* (assets and liabilities) is revised each quarter.

The *Currency and Deposits* component presents on the assets side the changes in the residents' currency deposits held abroad, and on the liabilities side – the changes in the liabilities of the resident banks to non-residents in domestic and foreign currency. Following the basic accounting principle and conventions set in the "*Balance of Payments Manual*" (IMF, 1993), when compiling that item the Bulgarian National Bank excludes any changes therein due to exchange rate changes.

Items *Other assets* and *Other liabilities* includes all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

D. Net errors and omissions

The *Net errors and omissions* component is an offsetting item. This component exists in the BOP presentation because the compilation system used by the Bulgarian National Bank is not a closed one but is a combination of different sources of information. Unlike other statistical reports, such as for example the monetary statistics, the collecting of the data necessary for the balance of payments compilation could not be restricted to the accounting records of the banks as the only source of information,

The fluctuations in the *Net errors and omissions*, both in sign and in size, are mainly due to: (i) revisions of export and import data, (ii) the development of the methodology for compilation of certain

balance of payments' components and (iii) the existence of objective obstacles to the collection of data on certain balance of payments' items.

E. Reserves and related items

- *Reserve assets* include those external assets that are readily available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, reserve position in the Fund, foreign exchange assets (consisting of currency and deposits and securities), and other claims. The entries under this category pertain to transactions in the BNB's external holdings which are administered by the Issue Department. The data on reserve assets changes included in the BOP table exclude valuation changes, due to exchange rate and market price changes.

This group in the analytic presentation of the balance of payments includes also *Use of Fund credit* and the item *Exceptional Financing*. The exceptional financing comprises the BOP support as well as deferred/rescheduled payments and payments on arrears, resulting from balance of payments difficulties. In accordance with the methodology for accounting the exceptional financing transactions ("Balance of Payments Manual", Fifth Edition (IMF, 1993), p. 454), the principal repayments on the BOP support credits are included in the *Financial Account – Other investment – Liabilities – Loans – General Government*.

III. PERIODICITY, FREQUENCY AND TIMELINESS OF THE BALANCE OF PAYMENTS PUBLICATIONS

The Bulgarian National Bank compiles and publishes the balance of payments of the country on a monthly basis. The schedule of the Bulgarian National Bank is to publish the data within six weeks (42 calendar days) after the close of the reference period.

IV. DATA REVISION POLICY

Revisions to published BOP estimates are a common feature of many balance of payments compilation systems. They are in compliance with the ECB Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB (which includes a data revision timetable). With the revisions publication, the users are timely acquainted with the revised data on the corresponding items.⁵ The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

(i) With the report for the first month of the quarter the monthly data for the whole current year are revised. With the reports for the second and the third month of the quarter, only data for the previous month are revised.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases as well as through the notes at the end of the balance of payments table.

⁵ The annual data on foreign direct investment in the country are revised 15 months after the close of the reporting period (after the annual NSI data on the nonfinancial sector are received in the BNB).

(iii) When significant revisions are made due to changes in the methodology for reporting of certain BOP components or other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users of the data.

V. DATA DISSEMINATION

The Bulgarian National Bank disseminates the monthly balance of payments data on its web site – <http://www.bnb.bg>.

The data is published also in the *Bulgarian National Bank Monthly Bulletin*.

Data on the balance of payments of the country is included in the semi-annual and in the annual official reports of the Bulgarian National Bank.

Data are simultaneously released to all interested parties.

VI. CONTACTS

If you have any questions on the methodology applied by the Bulgarian National Bank or on the balance of payments data published, please do not hesitate to send them to Mr. Emil Dimitrov, director of the Statistics Directorate , via e-mail at Dimitrov.E@bnbank.org, and Mrs. Liliana Bancheva, head of the Balance of Payments and External Debt Division , via e-mail at Bancheva.L@bnbank.org, or by mail to the following address:

Bulgarian National Bank
Balance of Payments and External Debt Division
