BALANCE OF PAYMENTS¹
JANUARY – FEBRUARY 2008

Current and Capital Account

In the period January – February 2008, the Current and Capital account deficit was EUR 1,280.8 million (3.9% of GDP), against a deficit of EUR 1,092.1 million (3.8% of GDP) for the same period in 2007.

Current Account

The Current account for February 2008 was negative and amounted to EUR 594.3 million and the deficit increased by EUR 121.5 million compared to the same month in 2007 (deficit of EUR 472.8 million). The main factor for the increase of the current account deficit compared to February 2007 was the higher (by EUR 128.8 million) trade deficit.

The Current account deficit in the period January – February 2008 was EUR 1,292.1 million, which is an increase of EUR 179.6 million compared to January – February 2007 (EUR 1,112.5 million). As a percent of GDP² the deficit amounted to 3.9% and was higher by 0.05 p.p. compared to January – February 2007 (3.9% of GDP). The main factors for the increase of the current account deficit were the higher (by EUR 153.7 million) trade deficit and (by EUR 75.3 million) services deficit, as well as the decrease of the Current Transfers balance (by EUR 54.1 million), while the contribution of Income, net (by EUR 103.6 million) was positive.

The trade deficit³ for February 2008 (EUR 596 million) increased by 128.8 million compared to February 2007 (EUR 467.2 million). Over the reporting period the trade balance was negative, amounting to EUR 1,206.8 million (3.7% of GDP) and the deficit increased by EUR 153.7 million compared to January – February 2007 (a deficit of EUR 1,053.1 million, 3.7% of GDP).

- In February 2008 **Exports (FOB)** amounted to EUR 1,205.7 million compared to EUR 906.1 million for the same month in 2007 and increased by EUR 299.6 million (33.1%). In January – February 2008 the exports amounted to EUR 2,320.2 million and increased by 30.7% (EUR 545.5 million) compared to the same period in 2007 (EUR 1,774.7 million). The exports growth rate in January – February 2007 yoy was 4.6%.
- **Imports (FOB)** for February 2008 amounted to EUR 1,801.7 million compared to EUR 1,373.3 million for the same month in 2007 and increased by EUR 428.4 million (31.2%). In January – February 2008 imports (FOB) amounted to EUR 3,527 million and increased by 24.7% (EUR 699.2 million) compared to the same period in 2007 (EUR 2,827.8 million). The imports growth rate for January – February 2007 yoy was 21.1%.

¹ The analysis is prepared after the analytical table of the Balance of Payments in EUR. The 2007 and 2008 data are preliminary. The data for January 2008 are revised. With the March 2008 report revisions of the February 2008 data will be presented.

² GDP for 2007 (preliminary NSI data) - EUR 28,898 million and forecast GDP for 2008 - EUR 32,753 million.

³ The problems with the coverage and quality of the data on exports and imports necessitate a much more careful analysis and interpretation of the data (see the methodological notes).

The balance on ***the Services item*** was negative, amounting to EUR 137.4 million (0.4% of GDP) and the deficit increased by EUR 75.3 million compared to the same period in 2007. This was due to the increase of the *Transportation* deficit (by EUR 47.2 million) and of *Travel deficit* (by EUR 35.9 million).

- ***Travel balance***⁴ was negative, amounting to EUR 68.5 million (0.2% of GDP) against a negative balance amounting to EUR 32.5 million (0.1% of GDP) for the period January – February 2008.

Income balance was positive amounting to EUR 83 million (0.3% of GDP) compared to a negative item of EUR 20.6 million for January – February 2007. The increase of the income balance yoy (by EUR 103.6 million) was mainly due to higher receipts on the item *Compensation of Employees*.

Net Current transfers were negative amounting to EUR 30.8 million (0.1% of GDP) against a positive balance of EUR 23.3 million (0.1% of GDP) for January – February 2007, and the decrease was EUR 54.1 million. The receipts from the European Union (EUR 6.6 million) decreased by EUR 10.9 million compared to the same period in 2007 (EUR 17.5 million). The payments of current transfers towards the EU for the reporting period amounted to EUR 89.5 million against EUR 74.9 million for the same period in the previous year.

Capital Account

The Capital account balance was positive and amounted to EUR 11.2 million (EUR 11.2 million net capital transfers from the EU funds), compared to a positive balance of EUR 20.4 million (EUR 19.9 million net capital transfers from the EU funds) for the period January – February 2007, and was lower by EUR 9.2 million.

Financial Account

The Financial account balance was positive amounting to EUR 935.5 million, compared to a positive balance of EUR 851.9 million for the same period in 2007 and was higher by EUR 83.6 million.

According to preliminary data ***the Foreign direct investment in Bulgaria*** for the reporting period was EUR 432.3 million (1.3% of GDP) and was higher by EUR 57.5 million compared to the same period in 2007 (EUR 374.9 million, 1.3% of GDP). The direct investment covered 33.5% of the current account deficit against 33.7% for January – February 2007. The receipts from real estate investment of non-residents were higher by EUR 14.9 million (6.8%) compared to January – February 2007 and amounted to EUR 234.3 million (54.2% of the direct investment for the period).

Portfolio investment - assets decreased by EUR 78 million, compared to an increase of EUR 18.9 million for the same period in 2007. The banks decreased their portfolio investments – assets by EUR 105.1 million against a decrease of EUR 1.1 million for the period January – February 2007. ***Portfolio investment – liabilities*** decreased by EUR 1.9 million against a decrease of 134.5 million for January – February 2007.

Other investment – assets decreased by EUR 898.5 million, compared to a decrease of EUR 535.6 million for the same period in 2007. The item *Currency and Deposits* of the banks decreased by EUR 934.2 million compared to a decrease of EUR 592 million for January – February 2007. ***Other investment – liabilities*** decreased by EUR 433.1 million against an increase of EUR 86.5 million for January – February 2007. The decrease for the reporting period in 2008 was mainly due to the decrease of non-residents' deposits in local banks (by EUR 490.9 million).

⁴ Estimates following a methodology of the BNB and the Ministry of Economy. For 2007 - 2008 data on the number of foreign visitors are based on data from National Border Police Service and NSI estimations. The BNB has been undertaking *Border Survey among Traveling Bulgarians and Foreigners* in order to update the methodology for estimation of the item *Travel* after the end of the survey.

The item ***Net errors and omissions*** was negative, amounting to EUR 28.7 million compared to a negative item amounting to EUR 188.9 million for the same period of 2007.

The ***Overall balance*** was negative, amounting to EUR 374.1 million (1.1% of GDP) compared to a negative overall balance of EUR 429.1 million (1.5% of GDP) for the same period in 2007.

As of end February 2008 the BNB reserve assets (excluding valuation changes) decreased by EUR 374.1 million compared to the end of December 2007.

DIRECT INVESTMENT
(January – February 2008)¹

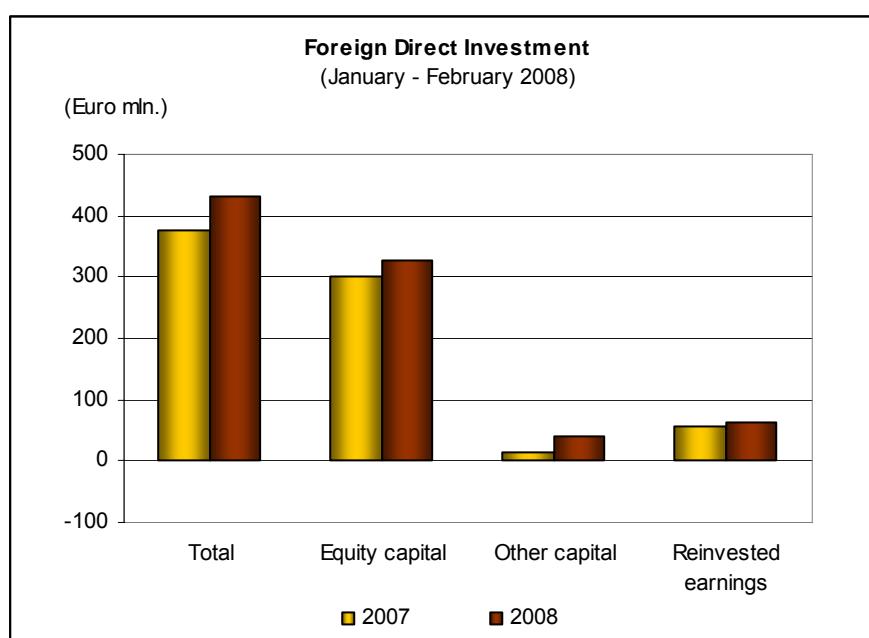

According to preliminary data, the **Foreign direct investment in Bulgaria** for January – February 2008 amounted to EUR 432.3 million (1.3% of GDP) compared to EUR 374.9 million (1.3% of GDP) attracted in January – February 2007.

* For assets, a minus sign denotes an increase in holdings, and a positive figure represents a decrease.

The attracted *equity capital (acquisition/disposal of shares and equities in cash and contributions in kind by non-residents in/from the capital and reserves of Bulgarian enterprises and receipts/payments from/for real estate deals in the country)* for January – February 2008 amounted to EUR 328.6 million, which was 85% of the foreign direct investment. It increased by EUR 25.9 million compared to that attracted in the same period of 2007 (EUR 302.6 million). The *receipts from real estate investments of non-residents* amounted to EUR 234.3 million compared to EUR 219.4 million for January – February 2007.

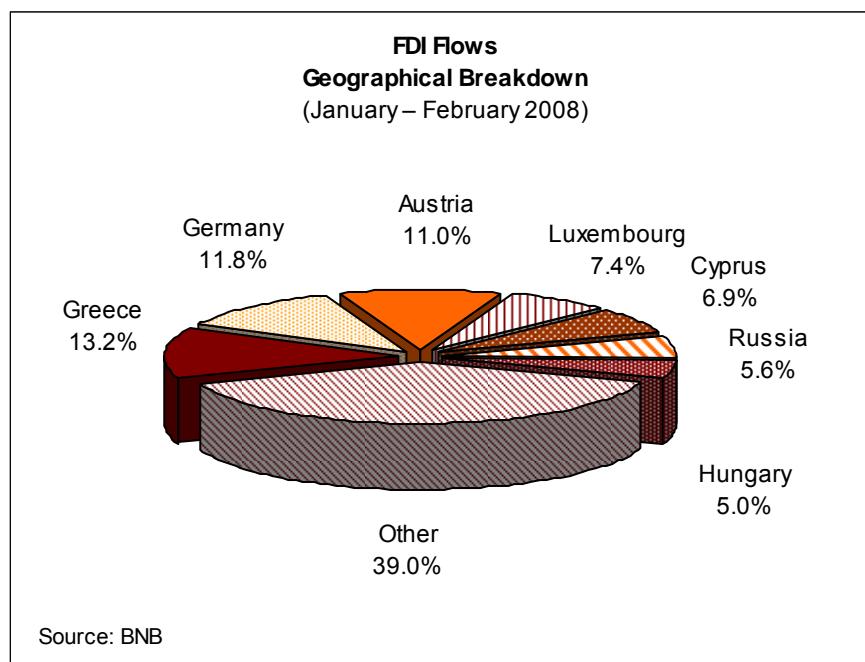

The attracted *equity capital on privatisation deals* with non-residents (that have acquired over 10% of the equity in a Bulgarian enterprise), reported in January – February 2008 did not increase, compared to an increase of EUR 1.4 million in January – February 2007. The attracted *equity capital on non-privatisation deals* totalled EUR 328.6 million in the reporting period, compared to EUR 301.3 million for the same period in 2007.

The *other capital, net (the change in the net liabilities of the direct investment enterprise to the direct investor on financial loans, suppliers' credits and debt securities)* was positive, amounting to EUR 40.5 million in January – February 2008, compared to a *net other capital*, amounting to EUR 15.7 million for the same period of 2007.

According to preliminary data, the *reinvested earnings² (the share of non-residents in the undistributed earnings/ loss of the enterprise)* in January – February 2008 are estimated at EUR 63.2 million compared to EUR 56.5 million in the same period of the previous year.

By country, the largest investments in Bulgaria for the reporting period were those of Greece (13.2% of the total foreign direct investment), the Germany (11.8%) and Austria (11%).

According to preliminary data in January – February 2008 **Direct investment abroad** increased by EUR 28.8 million compared to a decrease of EUR 19 million in January – February 2007. The invested in 2008 abroad equity capital amounted to EUR 28.8 million, compared to EUR 10 million in January – February 2007.

¹ Preliminary data for 2007 and 2008. The 2008 data are subject to revisions with the quarterly reports to the BNB from foreign direct investment enterprises, as well as with the NSI annual data.

² The 2007 and 2008 data include only banks' data on reinvested earnings.

* Analytic presentation in accordance with IMF 5-th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for January 2008 are revised. With the March 2008 report, balance of payments data for February 2008 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.

For 2008 preliminary NSI data which include data from the system INTRASTAT as of 3 April 2008 for the EU member states and customs declarations as of 2 April 2008 for non-EU countries.

³ The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

⁴ Estimates following a methodology of the BNB and the Ministry of Economy. For 2007 - 2008 data on the number of foreign visitors are based on data from NBPS and NSI estimations.

Data on Bulgarians travelling abroad during 2007- 2008 are received from the NBPS.

⁵ Estimates following a methodology of the BNB.

⁶ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁷ Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

The 2007 and 2008 data include only banks' data on reinvested earnings.

⁸ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

Due to quarterly reporting data are subject to revisions.

⁹ Mergers and acquisitions are included in this item.

¹⁰ Banks' data.

¹¹ Data on net change of trade credits-assets paid advances and receivables from suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹² Bank for International Settlements (BIS) data are used for January - September 2007. For October - December 2007 and for 2008 - data are subject to revisions.

¹³ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹⁴ Excluding valuation changes due to the exchange rate changes. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Analytic presentation in accordance with IMF 5-th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for January 2008 are revised. With the March 2008 report, balance of payments data for February 2008 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI. For 2008 preliminary NSI data which include data from the system INTRASTAT as of 3 April 2008 for the EU member states and customs declarations as of 2 April 2008 for non-EU countries.

The recalculation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

³ Estimates following a methodology of the BNB and the NSI.

⁴ Estimates following a methodology of the BNB and the Ministry of Economy. For 2007 - 2008 data on the number of foreign visitors are based on data from NBPS and NSI estimations.

Data on Bulgarians travelling abroad during 2007 - 2008 are received from the NBPS.

⁵ Estimates following a methodology of the BNB.

⁶ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁷ Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

The 2007 and 2008 data include only banks data on reinvested earnings.

⁸ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

Due to quarterly reporting data are subject to revisions.

⁹ Mergers and acquisitions are included in this item.

¹⁰ Banks' data.

¹¹ Data on net change of trade credits-assets paid advances and receivables from suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹² Bank for International Settlements (BIS) data are used for January - September 2007. For October - December 2007 and for 2008 - data are subject to revisions.

¹³ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹⁴ Excluding valuation changes due to the exchange rate changes. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Analytic presentation in accordance with IMF 5-th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for January 2008 are revised. With the March 2008 report, balance of payments data for February 2008 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI. For 2008 preliminary NSI data which include data from the system INTRAS-TAT as of 3 April 2008 for the EU member states and customs declarations as of 2 April 2008 for non-EU countries. The recalculations of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

³ Estimates following a methodology of the BNB and the NSI.

⁴ Estimates following a methodology of the BNB and the Ministry of Economy. For 2007 - 2008 data on the number of foreign visitors are based on data from NBPS and NSI estimations. Data on Bulgarian's travelling abroad during 2007 - 2008 are received from the NBPS.

⁵ Estimates following a methodology of the BNB.

⁶ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁷ Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

The 2007 and 2008 data include only banks' data on reinvested earnings.

Due to quarterly reporting data are subject to revisions.

⁸ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

Due to quarterly reporting data are subject to revisions.

⁹ Mergers and acquisitions are included in this item.

¹⁰ Banks' data.

¹¹ Data on net change of trade credits-assets paid advances and receivables from suppliers), reported to the BNB are included in this item. Due to quarterly reporting data are subject to revisions.

¹² Bank for International Settlements (BIS) data are used for January - September 2007. For October - December 2007 and for 2008 - data are subject to revisions.

¹³ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item. Due to quarterly reporting data are subject to revisions.

¹⁴ Excluding valuation changes due to the exchange rate changes. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

* Standard presentation in accordance with IMF 5-th edition of the "Balance of Payments Manual".

¹ Preliminary data. The data for January 2008 are revised. With the March 2008 report, balance of payments data for February 2008 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI.

³ For 2008 preliminary NSI data which include data from the system INTRASTAT as of 3 April 2008 for the EU member states and customs declarations as of 2 April 2008 for non-EU countries.

⁴ The recalulation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

⁵ Estimates following a methodology of the BNB and the NSI.

⁶ Data on Bulgarian travelling abroad for 2007 - 2008 are received from the NBPS.

⁷ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁸ Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

⁹ The 2007 and 2008 data include only banks' data on reinvested earnings.

¹⁰ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

¹¹ Due to quarterly reporting data are subject to revisions.

¹² Banks data.

¹³ Mergers and acquisitions are included in this item.

¹⁴ Data on net change of trade credits-assets paid advances and receivables from suppliers), reported to the BNB are included in this item.

¹⁵ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

¹⁶ Due to quarterly reporting data are subject to revisions.

¹⁷ Data on net change of International Settlements (BIS) data are used for January - September 2007. For October - December 2007 and for 2008 - data are subject to revisions.

¹⁸ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

¹⁹ Due to quarterly reporting data are subject to revisions.

²⁰ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

²¹ Due to quarterly reporting data are subject to revisions.

²² Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

²³ Due to quarterly reporting data are subject to revisions.

²⁴ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

²⁵ Due to quarterly reporting data are subject to revisions.

²⁶ Due to quarterly reporting data are subject to revisions.

^{*} Preliminary data. The data for January 2008 are revised. With the March 2008 report, balance of payments data for February 2008 are to be revised.

¹ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

² On the basis of monthly banks' reports and the quarterly reports of other investment intermediaries.

³ Due to the quarterly reporting of the non-bank investment intermediaries the data are subject to revisions.

⁴ Data from the monthly reports of the Central Depository.

⁵ The data on government debt securities, issued on the internal market, are based on quarterly reports of the primary dealers.

Due to quarterly reports of the primary dealers of government debt securities, data are subject to revisions.

⁵ For issues of government debt securities on external markets the data are from the monthly banks' reports and the Ministry of Finance.

¹ Preliminary data. The data for January 2008 are revised. With the March 2008 report, balance of payments data for February 2008 are to be revised.

² Data are based on customs declarations, supplemented with NSI data and processed by the BNB, as of date of customs clearing. The data are reconciled with the NSI. Partner country is the country of consignment. For 2008 preliminary NSI data which include data from the system INTRASTAT as of 3 April 2008 for the EU member states and customs declarations as of 2 April 2008 for non-EU countries.

The recalulation of imports at FOB prices is based on a methodology developed by the BNB and the NSI.

³ Estimates for freight transportation following a methodology of the BNB and the NSI.

⁴ Estimates following a methodology of the BNB and the Ministry of Economy. For 2007 - 2008 data on the number of foreign visitors are based on data from NBPS and NSI estimations.

Data on Bulgarians travelling abroad for 2007 - 2008 are received from the NBPS.

⁵ Estimates following a methodology of the BNB.

⁶ A minus sign denotes a capital outflow (increase in assets or decrease in liabilities).

⁷ Data are provided by direct investment companies reporting to BNB, Agency for Privatization, NSI, Central Depository, banks and others.

The 2007 and 2008 data include only banks' data on reinvested earnings.

⁸ On the basis of the reports submitted to the BNB by the enterprises with financial credits received from non-residents.

Due to quarterly reporting data are subject to revisions.

⁹ Mergers and acquisitions are included in this item.

¹⁰ Banks' data.

Due to quarterly reporting data are subject to revisions.

¹¹ Data on net change of trade credits-assets paid advances and receivables from suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹² Bank for International Settlements (BIS) data are used for January - September 2007. For October - December 2007 and for 2008 - data are subject to revisions.

¹³ Data on net change of trade credits-liabilities (received advances and payables to suppliers), reported to the BNB are included in this item.

Due to quarterly reporting data are subject to revisions.

¹⁴ Excluding valuation changes due to the exchange rate changes. A minus sign (-) denotes an increase in the reserves, a positive sign (+) - a decrease.

EXTERNAL TRADE

EXTERNAL TRADE OF BULGARIA¹

January 2008

Exports

In January 2008 the exports (FOB) amounted to EUR 1114.5 million compared to EUR 868.6 million for the same period in 2007, which is an increase of EUR 245.9 million (28.3%).

End Use

- The main contribution to the exports growth in January 2008 yoy was due to the groups *Petroleum Products* (an increase of EUR 82.2 million, 141.9%), *Non-Ferrous Metals* (an increase of EUR 38.7 million, 33.3%), and *Iron and Steel* (an increase of EUR 19.4 million, 27.8%).
- The exports of the group *Vehicles* decreased yoy by EUR 11.5 million (75.8%).

Main Trade Partners and Regions

- The exports to the European Union increased yoy by EUR 128.7 million (22.2%), and its share in the total exports decreased from 66.8% in January 2007 to 63.6% for the same period in 2008.
- The relative share of exports to the EU-15 member countries amounted to 52.4% in January 2008 compared to 56.9% for the same period in 2007.
- The highest growth of exports yoy was that to Greece – an increase of EUR 51.2 million (66.4%).
- The exports to Turkey increased by 36.9% (EUR 32.3 million), and to Singapore – almost tenfold (EUR 20.4 million). The exports to the USA decreased by 14.4% (EUR 2.8 million) and to Ukraine – by 11.9% (EUR 1 million).
- The greatest share in total exports was held by the exports to Greece (11.5% of total exports, EUR 128.3 million) followed by the exports to Germany (10.7% of total exports, EUR 118.8 million), to Italy (10.7% of total exports, EUR 118.9 million) and to Turkey (10.7% of total exports, EUR 119.7 million).

For the purposes of consistency with the BNB statistical series on imports and exports of goods by *Main Trade Partners and Regions* the external trade statistics data are classified according to the following criteria for trade partners: imports (*CIF*) – by country of origin; exports (*FOB*) – by country of consignment. The division of the EU member states into the groups *EU-15* and *EU – New Member States* is in accordance with the practice and requirements of EUROSTAT and the ECB.

¹ With the introduction of the INTRASTAT system at the beginning of 2007 changes have occurred in the reporting of external trade of Bulgaria with the rest of the EU member states (see methodological notes). The BNB receives from the NSI detailed data on dispatches and arrivals of goods within 60 days after the close of the reporting month. As a result, the part *External Trade of Bulgaria* of the issue *Balance of Payments of Bulgaria* covers a reporting period shorter than that of the balance of payments by one month.

Imports (CIF)

The imports (CIF) in January 2008 amounted to EUR 1,815.5 million compared to EUR 1,530.3 million for the same period in 2007, which is an increase of EUR 285.3 million (18.6%).

End Use

- The main contribution to the imports (CIF) growth in the period January 2008 yoy was due to the group *Crude Oil and Natural Gas* (an increase of EUR 151.4 million, 66.4%). Increase of imports was registered also by the following groups – *Food, Drinks and Tobacco* (an increase of EUR 20.9 million, 43.8%), *Non-Ferrous Metals* (an increase of EUR 22 million, 85.3%), *Iron and Steel* (an increase of EUR 15.7 million, 19%), *Raw Materials for the Food Industry* (an increase of EUR 15.2 million, 86.7%) and *Vehicles* (an increase of EUR 15 million, 19.1%).
- The greatest imports decrease yoy was that of the group *Furniture and Household Appliances* (EUR 9.4 million, 15.1%).

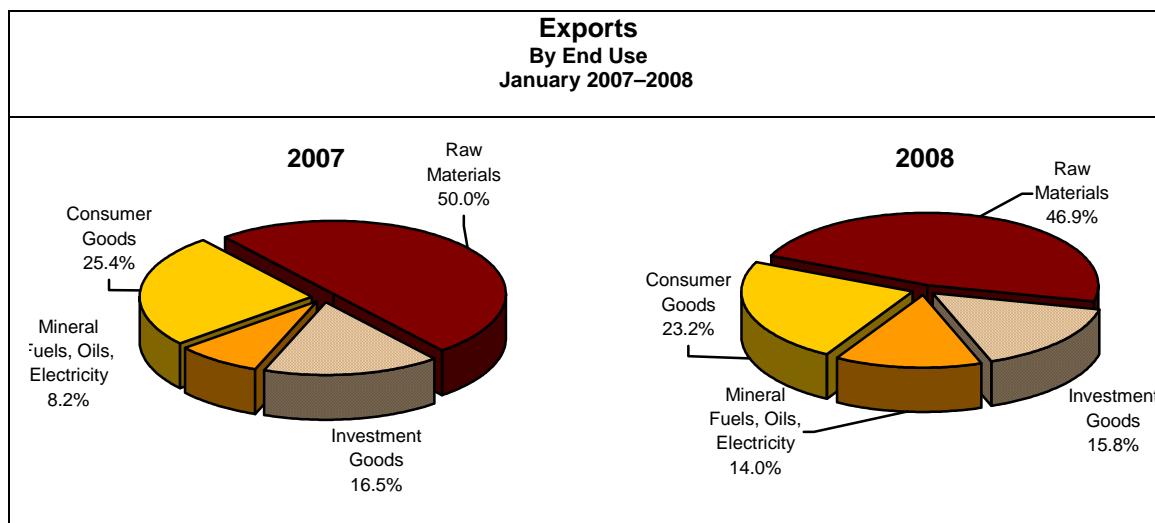

Main Trade Partners and Regions

- The imports from the EU increased yoy by EUR 37.6 million (4.8%), and its share in total imports decreased from 51.5% in January 2007 to 45.5% for the same period in 2008.
- The share of imports from the EU-15 decreased from 41.4% in January 2007 to 34.3% for the same period in 2008, and this was mainly due to the lower imports shares of Germany, Italy, Austria, Spain and the Netherlands.
- The highest increase yoy of imports was that from Russia (EUR 151.6 million, 62.4%).
- Strongly increased also the imports from Romania (EUR 38.8 million, 114%), Peru (EUR 37.6 million) and China (EUR 20.7 million, 25.3%).
- The greatest decrease of imports was that from Chile (EUR 14.7 million, 30.7%).
- The highest share in total imports (CIF) was that of the imports from Russia (21.7% of total imports, EUR 394.7 million), followed by that from Germany (9.7% of total imports, EUR 176.9 million).

METHODOLOGICAL NOTES ON THE COMPILATION OF THE BALANCE OF PAYMENTS OF BULGARIA

The Bulgarian National Bank is in charge of the compilation of the balance of payments of the country. The legal basis for the balance of payments compilation in Bulgaria is provided for in Article 42 of the Law on the Bulgarian National Bank. Data for the purposes of the BOP compilation are collected on the basis of Article 42 of the Law on the Bulgarian National Bank as well as on the basis of the Foreign Exchange Law. These data are processed by the "Balance of Payments and External Debt" Division within the Statistics Directorate of the BNB. At present, the Bulgarian National Bank compiles and publishes analytic presentation as well as standard presentation of the balance of payments in accordance with the *Fifth Edition* of the "***Balance of Payments Manual***" (IMF, 1993), the "***Balance of Payments Textbook***" (IMF, 1996), and the "***Guideline of The European Central Bank***" (ECB/2004/15)¹.

The balance of payments' methodology is conceptually related to that of the *System of National Accounts (SNA)*. The items of the balance of payments correspond closely to the relevant categories of the rest of the world account in the SNA.

There is a close relationship between the *International Investment Position* and the balance of payments as well. The BOP financial account measures an economy's transactions in external financial assets and liabilities, which affect the stock of external financial assets and liabilities measured in the international investment position.

I. ACCOUNTING PRINCIPLES AND CONVENTIONS

The basic convention applied in the construction of Bulgaria's balance of payments is the implementation of the double entry system. Under credit, with a positive sign, are recorded: exports of goods and services, income receivable, offsets to non-refundable real and financial resources received (transfers), increases in financial liabilities, decreases in financial assets. Under debit, with a negative sign, are recorded: imports of goods and services, income payable, offsets to non-refundable real and financial resources provided, increases in financial assets, decreases in financial liabilities.

The time of recording of the balance of payments transactions is the time of change of ownership.

Transaction valuations are based on market prices. If the actual market prices are not available, the average market prices are used as approximation.

Valuation changes of the country's external assets and liabilities are not included in the balance of payments.

The units of account for the balance of payments of Bulgaria are the EUR, the BG lev and the US dollar. The conversion into the unit of account is made using the exchange rate at the time of transaction. If not available, or inapplicable for other practical reasons, the average exchange rate for the reporting period is used.

¹ Guideline of The European Central Bank on the Statistical Reporting Requirements of The European Central Bank in the Field of Balance of Payments Statistics, The International Reserves Template and International Investment Position Statistics (ECB/2004/15)

II. BALANCE OF PAYMENTS COMPONENTS

The balance of payments components are compiled using basically the *International Transactions Reporting System* (ITRS), which includes (i) banks' reports, and (ii) reports by enterprises which have bank accounts abroad, pertaining to the residents' international transactions. These reports cover all components of the balance of payments table. In addition, the data on certain BOP components collected by the ITRS is substituted for data from other sources: (i) direct investment enterprise survey, (ii) administrative records, (iii) reports by enterprises having financial loans borrowed from and lent to non-residents and (iv) enterprise reports regarding their assets and liabilities (different from financial loans) with non-residents.

In the analytic presentation the balance of payments components are classified in the following main categories:

A. Current Account

The Current Account comprises the acquisition and provision of **goods and services**, **income**, and **current transfers** between the country and the rest of the world. The flows recorded on the credit side represent that part of the gross domestic product, which is provided to the rest of the world (exports of goods and services), as well as the provision of factors of production expressed by income receivable – compensation of employees and investment income (interest, dividends, etc.). Recorded are also offsets for non-refundable real and financial resources received (transfers).

The flows on the debit side represent the gross product created in the rest of the world and acquired by the domestic economy (imports of goods and services), as well as the acquisition of factors of production expressed by income payable. Recorded are also offsets to non-refundable real and financial resources provided.

- The Goods component of the BOP Current Account covers movable goods for which changes of ownership between residents and non-residents occur. The data on imports and exports FOB (Free on board) is based on customs declarations, as the codes used in them are after the Harmonised System for Description and Coding of Commodities of the World Customs Organisation, introduced in 1988 and supplemented in 1992. With the January 2006 data the Bulgarian National Bank and the National Statistics Institute jointly apply developed by them methodology for compilation of imports at FOB prices and receipts and payments regarding the freight transportation.² The methodology is based on the analysis of the CIF-FOB correlations for the imports of goods depending on the different imports delivery categories, as well as on the different mode of transportation and nationality of the carrier.

Sources: The source of data as from the beginning of 2003 until the end of 2006 was the Customs Agency and for preceding years - the Information services (at the Informational Computing Center Directorate). The Bulgarian National Bank and the National Statistical Institute received the exports and imports data, supplemented it with other information and processed it further. With the introduction of the system INTRASTAT (introduced with the Law on Statistics of Intercommunity

²The 2002 – 2005 data are based on this methodology for compilation of imports at FOB prices and receipts and payments regarding the freight transportation.

Merchandise Trade, GG. N51 of 2006) with the January 2007 data changes in the way of reporting of the external trade of Bulgaria with the rest of the EU member states took place.

The introduction of the system INTRASTAT led to changes in the deadlines for receiving and processing of the data. The information on exports (dispatches) and imports (arrivals) of goods are reported by the INTRASTAT operators (the firms obliged to report) to the National Revenue Agency within 20 days after the close of the reporting month. These data are sent to the National Statistical Institute for further processing. The NSI reports to EUROSTAT aggregated monthly data (without breakdowns by trade partners and by type of goods) within 42 days after the close of the reporting month. The detailed intra trade data on dispatches and arrivals of goods are reported to EUROSTAT within 70 days after the close of the reporting month.

The BNB receives aggregated data from the NSI (without breakdowns by trade partners and by type of goods) on the country trade with the other EU member states within 35 days after the close of the reporting month, and these data are supplemented by the data of the Customs Agency on trade with third countries. Before that with the publication of the report on the balance of payments for the reporting month only aggregated data on exports and imports are published. The BNB receives from the NSI within 60 days after the close of the reporting month detailed data on dispatches and arrivals of goods.

As a result of these changes the schedule for external trade data reporting by the BNB is the following:

- Preliminary aggregated data (without breakdowns by trade partners and by type of goods) for the reporting month are published within 42 days after the close of the reporting month in the balance of payments table.
- Preliminary detailed data (with breakdowns by trade partners and by type of goods) for the reporting month are distributed to users not earlier than 73 days after the close of the reporting month.

The published series of data on exports and imports of the country on the web site of the BNB are updated not earlier than 73 days after the close of the reporting month.

In accordance with the common methodology, before publishing the data, the BNB and the NSI have to agree upon the data.

- The Services component comprises *transportation, travel, and other services*.

The Bulgarian National Bank derives the data on *freight transportation* from foreign trade data and the data on *passenger transportation* from travel data on the basis of estimates.

With the January 2006 data the BNB introduced a new methodology for compilation of receipts and payments regarding the freight transportation. The freight transportation receipts are set up on the basis of estimated receipts of resident carriers related to the country exports of goods. The payments are calculated as an estimation of the payments made by residents on behalf of non-resident carriers related to the country imports of goods. The receipts and payments are estimated according to mode of transportation and nationality of the carrier. With the introduction of the system INTRASTAT with the January 2007 data changes in the way of compilation of receipts and payments regarding the freight transportation of Bulgaria with the rest of the EU member states took place. Due to the delay in receiving the detailed data on trade of Bulgaria with the rest of the EU member states

from the NSI, as of the date of publication of the preliminary balance of payments report for the corresponding month (42 days after the close of the reporting period) the preliminary compilation of receipts and payments of freight transportation is based on data for preceding years. For exports of transport services the estimate is 7.5% of goods exports FOB, of which 61.8% are performed by resident carriers and are transactions of the balance of payments. For imports of transport services the preliminary estimate is 5% of the imports FOB, of which 48% are performed by non-resident carriers and are subject to reporting in the balance of payments. These estimates are subject to revisions after receiving the preliminary detailed data (with breakdown by trade partners and by type of goods) on trade with the rest of the EU member states for the reporting month.

Travel covers goods and services, including those related to health and education, acquired by travellers for business and personal purposes. The data on travel is based on data from the Ministry of Internal Affairs on the number of travellers crossing the borders and on estimates of *per capita* expenditures, the latter based on the methodology for estimation of the receipts and expenditures from travel services – “*Methodology For Estimation of the Receipts and Expenditures from Travel in the Bulgarian Balance of Payments*” (Bulgarian National Bank, Ministry of Trade and Tourism, 18 November 1999). The 2007 data for the number of foreigners who visited the country are based on information from the border police and NSI estimates. The BNB has been undertaking *Border Survey among Traveling Bulgarians and Foreigners* in order to update the methodology for estimation of the item *Travel* after the end of the survey.

Other services item covers receipts and payments related to services other than transportation and travel (communication, construction, financial, leasing, insurance, cultural, sport and recreational services, etc.).

The *main sources* of information on this item are the banks' reports and the reports of enterprises having accounts abroad.

- *Income* consists of two categories: (i) compensation of employees, and (ii) investment income. Compensation of employees covers wages, salaries and other benefits paid to non-resident workers in the country or received by resident workers abroad. The compensation of employees comprises also income due to illegal employment. The BNB estimates this flow in accordance with the *Methodology for Estimation of Flows due to Illegal Employment* (14 March 2006).³ Investment income covers receipts and payments of income associated with external financial assets and liabilities. Included are receipts and payments on direct investment, portfolio investment, other investment, and receipts on reserve assets.

The *main sources* of information on the *Income* component are the banks' reports and the reports of enterprises, the Ministry of Finance, and the Bulgarian National Bank.

- *Transfers* are all real resources and financial items provided without a quid-pro-quo from one economy to another. *Current transfers* directly affect the level of disposable income of the economy, and the consumption of goods and services. That is, current transfers reduce the income and consumption potential of the donor and increase the income and consumption potential of the

³ The data as from April 2001 are based on this methodology.

recipient. Included in the *Current transfers* are the EU pre-acquisition grants, other grants, gifts, inheritances, prizes won from lotteries, pensions, current taxes, social security contributions, etc.

Sources: The Bulgarian National Bank receives information on current transfers from the Ministry of Finance, the Bulgarian Red Cross, the Agency for Foreign Aid, and from the monthly banks' reports.

B. Capital Account

The *Capital Account* consists of two categories: (i) *capital transfers* and (ii) *acquisition or disposal of non-produced, non-financial assets*. If in kind, a capital transfer consists of (i) a transfer of ownership of fixed assets, or (ii) forgiveness of a liability by a creditor when no counterpart is received in return. If in cash, a transfer is a *capital transfer* when it is linked to, or conditional on, the acquisition or disposal of fixed assets (for example, an investment grant).

Sources: The Bulgarian National Bank receives information on the capital account from the Ministry of Finance (for capital transfers from the EU funds), from the quarterly reports of the enterprises in the non-financial sector, the monthly reports of the notaries and others.

C. Financial Account

The *Financial Account* comprises all transactions (actual and imputed) in the external financial assets and liabilities of an economy. The external assets and liabilities are primarily classified according to type of investment. Included in *Financial Account* are (i) *direct investment*, (ii) *portfolio investment* and (iii) *other investment*.

- *Direct investment* covers direct investment abroad, direct investment in reporting economy and mergers and acquisitions. The subitem *Mergers and Acquisitions* shows the transactions related to mergers and acquisitions. The purpose of its inclusion was to eliminate the influence of such deals over the reported foreign direct investment data. The international practice shows that these transactions have hardly any real impact on the production capacities and employment and the conclusions drawn from the interpretation of foreign direct investment data in which data on mergers and acquisitions are included might be misleading about investment flows, developments, branch and geographical structure. ("European Central Bank, Eurostat, Foreign Direct Investment Task Force Report", March 2004, para.332)

Direct investment is a category of international investment in which a resident of one economy – a direct investor – acquires a lasting interest (at least 10% of the ordinary shares or the voting power) in an enterprise resident in another economy – a direct investment enterprise. The direct investment includes both the initial transaction, through which the relationship between the direct investor and the direct investment enterprise is established, and all subsequent transactions between them. The direct investment covers transactions relating to changes in the direct investor's share in the equity capital of the direct investment enterprise, inter-company debt transactions as well as the share of the direct investor in the undistributed earnings/loss of the direct investment enterprise. Direct investment is reported on a directional basis: direct investment abroad – as an asset, and direct investment in the reporting country – as a liability.

Sources: The Bulgarian National Bank receives monthly data on direct investments in the country from the Privatisation Agency, the Central Depository and from banks' reports; quarterly data -

from the Insurance Supervision Directorate at the Ministry of Finance, from the reports for inter-company debt transactions and from the statistical survey carried by the NSI among non-financial sector enterprises and annual data from the banks' annual financial and accounting reports (Balance Sheet and Profit and Loss Statements) and from enterprise reports provided to the BNB. For data on direct investments abroad the Bulgarian National Bank uses the information from FDI declaration forms, quarterly reports of non-financial sector enterprises and monthly reports of the banks. With these data, after cross-checking of the information, the monthly data (received from the banks and included before that in the balance of payments) are replaced.

- *Portfolio investment* includes *portfolio investment, assets and portfolio investment, liabilities*.

Portfolio investment covers transactions in shares and equity if the investor's share in the capital is less than 10%, transactions in bonds, notes, money market and other tradable securities.

The *main source* of information on the liabilities side of the *Portfolio investment* is the data provided by the Ministry of Finance, the Bulgarian National Bank, banks, enterprises holding bank accounts abroad, and the Central Depository. Data on the assets side of the *Portfolio investment* is provided by banks (which give information about their and their clients' portfolio investments), the Bulgarian National Bank and the Ministry of Finance.

- *Other investment* covers trade credits, loans, currency deposits, and other assets and liabilities.

According to the balance of payments conventions trade credit arise from the direct extension of credit from a supplier to a buyer, i.e this is a credit extended by a trade partner without issue of a tradable security.

The main source of information on trade credits-assets and liabilities are the quarterly reports of enterprises on their assets/liabilities to non-residents.

Loans item includes received and paid principals on short- and long-term loans between residents and non-residents if no issue of a tradable security is involved with these loans.

Transactions concerning disbursements and repayments of principals on IMF loans and disbursements on loans on BOP support are not included in the item *Loans*. They are recorded in the relative items of group *E. Reserves and Related Items*.

Data on the item *Loans* is received by the Ministry of Finance, the Bulgarian National Bank, the banks and directly by the enterprises that have lent to or borrowed from abroad. The latter report quarterly data to the BNB because of which the monthly data on *Loans, Other sectors* (assets and liabilities) is revised each quarter.

The *Currency and Deposits* component presents on the assets side the changes in the residents' currency deposits held abroad, and on the liabilities side – the changes in the liabilities of the resident banks to non-residents in domestic and foreign currency. Following the basic accounting principle and conventions set in the "Balance of Payments Manual" (IMF, 1993), when compiling that item the Bulgarian National Bank excludes any changes therein due to exchange rate changes.

Items *Other assets* and *Other liabilities* includes all transactions on miscellaneous accounts receivable and payable not included elsewhere and transactions in arrears.

D. Net errors and omissions

The *Net errors and omissions* component is an offsetting item. This component exists in the BOP presentation because the compilation system used by the Bulgarian National Bank is not a closed one but is a combination of different sources of information. Unlike other statistical reports, such as for example the monetary statistics, the collecting of the data necessary for the balance of payments compilation could not be restricted to the accounting records of the banks as the only source of information,

The fluctuations in the *Net errors and omissions*, both in sign and in size, are mainly due to: (i) revisions of export and import data, (ii) the development of the methodology for compilation of certain balance of payments' components and (iii) the existence of objective obstacles to the collection of data on certain balance of payments' items.

E. Reserves and related items

- Reserve assets include those external assets that are readily available to and controlled by the central bank (government) for direct financing of balance of payments imbalances. The reserve assets comprise monetary gold, SDRs, reserve position in the Fund, foreign exchange assets (consisting of currency and deposits and securities), and other claims. The entries under this category pertain to transactions in the BNB's external holdings which are administered by the Issue Department. The data on reserve assets changes included in the BOP table exclude valuation changes, due to exchange rate and market price changes.

This group in the analytic presentation of the balance of payments includes also *Use of Fund credit* and the item *Exceptional Financing*. The exceptional financing comprises the BOP support as well as deferred/rescheduled payments and payments on arrears, resulting from balance of payments difficulties. In accordance with the methodology for accounting the exceptional financing transactions ("Balance of Payments Manual", Fifth Edition (IMF, 1993), p. 454), the principal repayments on the BOP support credits are included in the *Financial Account – Other investment – Liabilities – Loans – General Government*.

III. PERIODICITY, FREQUENCY AND TIMELINESS OF THE BALANCE OF PAYMENTS PUBLICATIONS

The Bulgarian National Bank compiles and publishes the balance of payments of the country on a monthly basis. The schedule of the Bulgarian National Bank is to publish the data within six weeks (42 calendar days) after the close of the reference period.

IV. DATA REVISION POLICY

Revisions to published BOP estimates are a common feature of many balance of payments compilation systems. They are in compliance with the ECB Timetable for Exchange of Balance of Payments, International Investment Position and Reserve Assets Statistics within the ESCB (which includes a data revision timetable). With the revisions publication, the users are timely acquainted with

the revised data on the corresponding items.⁴ The policy on revisions pursued by the Bulgarian National Bank is based on the following principles:

(i) With the report for the first month of the quarter the monthly data for the whole current year are revised. With the reports for the second and the third month of the quarter, monthly data for the current quarter are revised.

(ii) When on-going changes are made due to additional information collected, as well as resulting from elimination of errors, the Bulgarian National Bank timely informs the users through the monthly press releases as well as through the notes at the end of the balance of payments table.

(iii) When significant revisions are made due to changes in the methodology for reporting of certain BOP components or other reasons, the Bulgarian National Bank publishes in advance information on the changes to facilitate the users of the data.

V. DATA DISSEMINATION

The Bulgarian National Bank disseminates the monthly balance of payments data on its web site – <http://www.bnbg.bg>.

The data is published also in the *Bulgarian National Bank Monthly Bulletin*.

Data on the balance of payments of the country is included in the semi-annual and in the annual official reports of the Bulgarian National Bank.

Data are simultaneously released to all interested parties.

VI. CONTACTS

If you have any questions on the methodology applied by the Bulgarian National Bank or on the balance of payments data published, please do not hesitate to send them to Mr. Emil Dimitrov, director of the Statistics Directorate , via e-mail at Dimitrov.E@bnbank.org, and Mrs. Liliana El Haddad, head of the Balance of Payments and External Debt Division , via e-mail at Elhaddad.L@bnbank.org, or by mail to the following address:
